

Vessel and Aircraft Repair and Maintenance

FY2001 Request: \$200,000

Reference No: 30129

AP/AL: Appropriation
Category: Health/Human Services
Location: Statewide
House District: Statewide (HD 1-40)
Estimated Project Dates: 07/01/2000 - 06/30/2005

Project Type: Renovation and Remodeling
Contact: Doug Mecum
Contact Phone: (907)465-4210

Brief Summary and Statement of Need:

This project will provide funding to maintain the department's research vessels and aircraft, which are used to support fishery monitoring efforts and stock assessment programs. Maintenance work to be done includes replacing the gensets, sandblast and paint, overhaul engines, general yard work and inspection, and replacing fishing gear and aircraft manuals.

Additional Information / Prior Funding History:

This is an annual request which has received prior funding in order for the department to maintain its research vessels and aircraft in a safe operating condition. Prior year funding for the past five years is as follows: FY2000 \$150.0, FY1999 \$250.0, FY1998 \$250.0, FY1997 \$425.0, FY1996 \$150.0.

Project Description/Justification:

Major maintenance work will be performed on the division's large vessels (R/V Sundance, R/V Medeia, R/V Montague, R/V Pandalus, R/V Resolution and R/V K-HI-C) and aircraft. These vessels and aircraft support fishery monitoring efforts and are extensively involved in salmon, herring, groundfish, and shellfish stock assessment programs contained in the department's budget. The vessels and aircraft are used by other divisions in the department, and the Department of Public Safety to carry out their operational responsibilities as well.

Annual maintenance of the vessels and aircraft is necessary to maintain their longevity and protect the state's investment. Some examples of work are: replace genset; sandblast and paint; general yard work and inspection; engine overhauls; replacing fishing gear and aircraft manuals. If it becomes necessary, some of these funds might be used for unanticipated replacement of smaller unmanned vessels or large maintenance projects on division aircraft.

The fishery monitoring and stock assessment programs carried out by these vessels and aircraft are critical to the division's ability to meet its constitutional mandate to manage the state's fishery resources for sustained yield.

The projects funded by this request will ensure that the vessels and aircraft can continue to carry out their missions, as well as ensure the health and safety of the skippers, and crew.

Commercial fishing is the state's largest private sector employer. The programs supported by these vessels and aircraft ensure the continuation of commercial fisheries, and thus the jobs of those involved in the industry.
