**Additional Information / Prior Funding History:**

**Project Description/Justification:**

Tudor-Bragaw intersection improvements - \$7 million. This project would construct additional auxiliary turn lanes at the intersection of Tudor Road and Bragaw Street. The south edge of Tudor Road would be shifted 12 feet further south to provide an additional east and westbound left turn lane on Tudor Road. The west edge of Bragaw Street would be shifted 12 feet further west to provide an additional southbound through and right turn lane. The east edge of Bragaw Street would be shifted 12 feet further east to provide a northbound right turn lane. Use of state and local funds would speed project delivery, as there are inadequate STIP funds to apply to the project.
