Additional Information / Prior Funding History:

Project Description/Justification:

The Department of Transportation and Public Facilities is requesting that several old general fund appropriations be reappropriated to cover part of the cost of a new warm storage building in Nome. Each year old appropriations are reviewed to determine if projects have been completed and whether project balances are available for reappropriation. This year's review is complete and \$2,067,329 in general funds are expected to be available for reappropriation. The original appropriations include highway and airport state match, planning projects, advanced project definition, the research program and other governor requested capital projects.
