Senator Ellis and Representative Gara,

Government Hill Elementary would like to request \$30,000 for technology and supplies. We need to purchase new computers and servers for our building. Many of our students lack the resources necessary to obtain computers at home and our school serves as their only access to the Internet and email. With the amount of information that can be extracted and utilized from the Internet, and our school system's increased reliance on computer based educational programs, access to technology is extremely crucial. Our current computers are old and outdated, many of which cannot support or run many of the newer educational software items. If your office can help us get our students the equipment they need and deserve, we will have the ability to provide a more comprehensive and effective educational curriculum to our students. Thank you for your time and continued support!
