

**Compliance Cleanup Site Restoration****FY2010 Request: \$17,000,000****Reference No: AMD 43330****AP/AL:** Appropriation**Project Type:** Health and Safety**Category:** Public Protection**Location:** Statewide**Contact:** John Cramer**House District:** Statewide (HD 1-40)**Contact Phone:** (907)428-6009**Estimated Project Dates:** 07/01/2008 - 06/30/2014**Brief Summary and Statement of Need:**

The Compliance Cleanup Site Restoration projects address soil and groundwater contamination issues at numerous Alaska Army National Guard facilities throughout the state. Compliance clean up liability is estimated to be \$33.9 million. Program funds are used to investigate and cleanup contaminated sites. Projects are 100% federally reimbursable through the National Guard Bureau Army National Guard (ARNG) compliance cleanup program and effectively address the environmental compliance liabilities associated with ARNG training and facility operations on federal, state and third-party properties.

**Additional Information / Prior Funding History:**

Prior to FY2008, projects were executed using federal contracting resources through the United States Property and Fiscal Office (USPFO) for Alaska. Use of state procurement methods allow for increased contractor competition and direct state oversight and control.

SLA 2007, CH 30, page 96, line 30 \$5,000.0

SLA 2008, CH 29, page 151, line 31 \$5,000.0

**Project Description/Justification:**

Annual federal dollars have not been coming into the department as originally anticipated resulting in the department not submitting a FY2010 Capital Budget Request for additional federal receipts. The department was recently notified that federal funds will be available for this clean up and restoration in a lump sum during FY2009 and again during FY2010. Existing capital federal authority is not adequate to receive and expend the \$17,000.0 in anticipated federal receipts.

The Alaska Army National Guard (ARNG) Compliance Cleanup program is 100% federally funded by the US Army through the National Guard Bureau (NGB) Master Cooperative Agreement (MCA) ARNG Environmental Program Resources Management appendix entered into with the Department of Military and Veterans Affairs. This program addresses the clean up of petroleum product releases that occurred in conjunction with military training and facility operations. The cleanup projects provide environmental cleanup for soil and groundwater

## Compliance Cleanup Site Restoration

**FY2010 Request: \$17,000,000**

**Reference No: AMD 43330**

as required by state cleanup rules (AS 46.03.740, AS 46.04.020 and 18 AAC 75). Successful program execution provides facilities that do not pose threats to human health, drinking water resources, or lands and waters of the state. These projects eliminate financial liabilities that might otherwise be attributed to the state and federal governments.

As part of the project execution, contractors are compelled to use labor, equipment, and services that are available at the location of the cleanup. The affected facilities are predominantly located in rural parts of western Alaska and provide opportunities for non-permanent employment and service provision in these communities. For facilities that may be involved in divestiture actions, site restoration allows unconditional facility transfer to local entities.

The project scoping process involves representatives from the Alaska Army National Guard, National Guard Bureau, US Army, as well as the Alaska Department of Environmental Conservation. Remedial actions are selected on the basis of several variables to include: contaminant types and concentration, potential receptors at risk, site geology and hydrogeology, availability and viability of treatment technologies, and opportunities for financial efficiencies. Cleanup costs are estimated according to US Army protocols, using auditable methods and resources. At response completion, there are no additional liabilities related to continued operations and maintenance.

### **Project Mission:**

This project request will provide safe, sustainable facilities and training lands, directly supporting the state and federal mission of Alaska Army National Guard while reducing the liabilities associated with managing contaminated sites. Unconditional closure of these sites will provide maximum flexibility to the command and management when making decisions related to stationing, support, and transformation.

### **Why is this project needed now?**

The funding authority is requested to allow execution of this federal program as funding becomes available through the existing National Guard Bureau Master Cooperative Agreement.
