None.

Project Description/Justification:

The existing temporary bridge is inadequate and does not meet the needs of the community. It was installed as a temporary measure several years ago to keep the access to the airport open. This road is the only vehicular access the village has to the airport. Replacing the bridge with a safer more durable structure would make the delivery of passengers and freight more efficient and improve the overall safety for the traveling public.

This project meets the prioritization criteria of safety, serves an economically distressed area, and can turn dirt in 2009. Advertising of this project is estimated to take place in Spring/Summer 2009.
