Additional Information / Prior Funding History:

None.

Project Description/Justification:

An increasing number of two-lane rural highways in Central Region carry more traffic than they were designed to handle, either in the summer or year-round, and serve both through traffic traveling at high speeds and slower traffic trying to access businesses and homes adjacent to the roads. The congestion, high volumes of turning traffic and inconsistent speeds result in a high incidence of fatal and major injury crashes. The above improvements will help to reduce speeds and manage traffic more safely.

Two additional improvements could be initiated and/or constructed if additional funds are allocated:

- Knik-Goose Bay widening from the Palmer-Wasilla Highway to Fern Street
- Sterling Highway widening from Soldotna to Mackey Lake Road
