The Department requests \$468.9 spread through multiple fund sources to cover the increased lease costs of the Anchorage office building.

This amendment provides FY2012 funding based on an FY2011 supplemental request.

The Department requests \$146.3 spread through multiple fund sources to cover the unexpected increase in lease costs for the Juneau office building. The

department was notified by the Division of General Services in late December 2010 that the Juneau office building lease amount would be increased for both FY2011 and FY2012. Lease costs for the department have increased 87% over the last seven years. The department has taken various cost cutting measures to cover increased lease costs but cannot absorb this unanticipated increase. The FY2012 budget contains a similar request for increased lease costs for the Anchorage office building.

The federal funds received by the Food Safety and Sanitation Program are received through a negotiated contract with the Food and Drug Administration (FDA). The contract covers a percentage of the costs for inspections performed by the program. The FDA is extremely resistant to negotiating for increases to per-inspection costs. After several denials, the program was successful in getting a small negotiated increase in FY2011. However, the negotiated per-inspection cost increase resulted in reducing the number of FDA inspections performed. An increase in the per-inspection costs for FY2012 will be sought, but it is unlikely the FDA will agree, as the funds available for all the States are insufficient to fully fund any one State's program.

Congressional legislation is being considered to increase the funding at a national level for food safety programs, but the current political climate is not conducive to increases in federal funding. The program will continue to diligently negotiate, but does not anticipate an increase in federal funds in FY2012. Therefore these additional personal services costs must be covered by another fund source. The program proposes GFPR, as this revenue can be collected through fee collection for program services. Additional GFPR collection is possible due to fee implementation in FY2011 for the Food Worker Card program.

1002 Fed Rcpts		-21.9										
1005 GF/Prgm		27.5										
1007 I/A Rcpts		-5.6										

The Office of the State Veterinarian section of the Laboratory Services Program applies for and receives several Animal Disease related grants from the United State Department of Agriculture (USDA). These small grants, some \$10,000 or less, are disease specific and allocated by region at a fixed amount. The award amounts fluctuate annually, but have been decreasing. Additionally, opportunities available in one year are not always available the next year from the federal funding agency, making grant availability unpredictable. The grants available for the Laboratory Services Program are through competitive application processes. The Laboratory Services Program had in previous years been awarded a grant from the USDA's Food Safety and Inspection Service Food Emergency Response Network (FERN) division. However, due to decreasing funds available for federal food safety programs, the competitive requirements for this grant have been raised and DEC's application was subsequently denied for the FY11-12 grant. The Laboratory also applied for, but was denied, a similar FERN-related grant offered by the Food and Drug Administration (FDA). The Laboratory is not currently able to meet the raised eligibility requirements for these competitive grants.

The program proposes GFPR, as this revenue can be collected through fee collection for program services. Regulation changes in the Drinking Water Program and Solid Waste Program led to increased fees for laboratory testing. Additionally, the Lab has seen a growth in the demand for testing over the past two years so additional GFPR will be collectible.

Additionally, uncollectible IA authority exists in this component, rendering this authority increase unusable.

Laboratory Testing for Outside Parties

	Inc	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	PFT	PPT	NP
1108 Stat Desig		50.0	35.0	0.0	5.0	10.0	0.0	0.0	0.0	0	0	0

The Department requests \$50.0 in Statutory Designated Program Receipt authority.

The Environmental Health Services Laboratory has encountered several situations recently in which testing services could have been provided to parties not covered under the current fee structure. These testing requests are for services not currently offered by the private sector and have been determined to be in the interest of public and environmental health. No authorization currently exists that would allow us to collect the revenue necessary to cover the associated costs. This revenue type would allow the Lab to perform these types of testing services.

Microbiological Support for Shellfish Testing

	Inc	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	PFT	PPT	NP
1005 GF/Prgm		80.0	50.0	0.0	0.0	30.0	0.0	0.0	0.0	1	0	0

The Department requests \$80.0 in General Fund Program Receipt (GFPR) authority. Regulation changes in several programs have led to increased fees for laboratory testing. The division requests one Microbiologist position to process the increasing number of samples from geoduck farms and marine water testing.

Department of Environmental Conservation

Component: Laboratory Services (2065)
RDU: Environmental Health (207)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP
The Lab has seen a growth in the demand for testing over the past two years and does not have sufficient GFPR authority to conduct this increase in testing. Six geoduck farms and three wild harvest sites were added over the course of the past year, each producing an estimated 20 additional Paralytic Shellfish Poison (PSP) samples. This adds an additional 180 tests to the 589 samples tested in FY2010. In FY2011, the legislature added one position to the Food Safety component to monitor new harvest areas but did not add a position to the lab for the testing of the resulting samples.

1005 GF/Prgm		39.4										

Federal funds received by the Drinking Water Program are regionally allocated at fixed amounts to the states, and the Alaska program is currently receiving the maximum allowed by the Environmental Protection Agency (EPA). Therefore, the division is not able to increase the amount allocated to Alaska in the existing federal grants to cover these additional personal service costs, nor does the program have additional federal funding coming in FY2012 from any other source. The EPA is the only federal agency that provides grant funding for the Safe Drinking Water Act. Therefore, these additional personal services costs must be covered by another fund source. The program proposes GFPR, as this revenue can be collected through fee collection for program services. An increased GFPR collection is possible due to regulation changes to fees in the Drinking Water Component.

Drinking Water Technical Assistance

	Inc	30.0	20.0	0.0	5.0	5.0	0.0	0.0	0.0	0	0	0
1005 GF/Prgm		30.0										

The Department requests an increase of \$30.0 in General Fund Program Receipt authority due the adoption of new federal rules.

As a result of the adoption of new federal rules, the Alaska Drinking Water Program is required to provide services to drinking water systems which include inspections and technical assistance. The cost for some of this work is covered by fees collected from public water systems. Regulations have been updated to reflect a higher hourly rate commensurate with costs to perform the services. The State is required to provide these services and the hourly rate has not increased for several years. This will improve the State's ability to protect public health through immediate response to suspected waterborne disease outbreaks, investigation of contaminant level exceedances, and rapid response to consumer complaints.

The Solid Waste Program receives only two federal grants, one from United States Department of Agriculture (USDA) and one from the Environmental Protection Agency (EPA). The USDA grant award is under \$20,000 and restricted to Pesticides Recordkeeping. No increase is expected for the USDA grant, and the recordkeeping duties performed by the program are limited to the funds received. The EPA grant for pesticides is a consolidation of several separate but related topics, and is likewise restricted to the specialized tasks performed by the program. The annual EPA grant is allocated by region at a fixed amount and no additional federal funds can be requested above this allocated amount. The regional Pesticides grant allocations have gradually been decreasing. The program is researching for additional federal grants, but thus far has been unsuccessful in locating prospective opportunities for which to apply. Therefore, these additional personal services costs must be covered by another fund source. The program proposes GFPR, as this revenue can be collected through fee

collection for program services. An increased GFPR collection is possible due to regulation changes to fees in the Solid Waste Component.

Align General Fund Program Receipt Authority with Program Expenses and Revenue

	IncM	40.0	30.0	0.0	0.0	10.0	0.0	0.0	0.0	0	0	0
1005 GF/Prgm		40.0										

The Department requests an increase of \$40.0 in General Fund Program Receipt authority.

The program performed an analysis of the time spent issuing permits to small, medium, and large landfills as well as industrial waste disposal permits. AS 37.10.052 requires DEC to conduct this analysis every four years and verify permit fixed fees accurately reflect direct costs to the State. Regulations have been updated to reflect the new rates. The funds are necessary to cover increasing personal services costs for staff who review permit applications and perform facility inspections, which will increase the percentage of landfills that are permitted. Landfills that are permitted are less likely to harm the environment or have a negative impact on public health.

1003 G/F Match	10.0										

The Fairbanks North Star Borough area currently faces significant air quality issues. Before gasline construction can begin, 12 months of air quality monitoring and modeling is required as part of the Environmental Impact Statement (EIS) as well as a technical review period for construction permit applications. The EIS will have to predict and evaluate air quality impacts in the Fairbanks North Star Borough due to increased activity related to a major construction project. Air quality impacts and potential mitigation measures will demand agency review and input as part of the EIS process beginning in FY2012.

Air Quality Permitting

ADN 1810362 Time status change of PCN 18-7731 Environmental Program Specialist II from PPT to PFT												
	PosAdj	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	1	-1	0
Change time status of PCN 18-7731 from a part-time Environmental Program Specialist II (Range 16) to a full-time Environmental Program Technician (Range 13). Full-time para-professional assistance is needed to provide support to engineering staff in the Pipeline and Tank Integrity section of the Industry Preparedness and Pipeline Operations component.												
ADN 1810363 HB 369 PCN 18-#059 Program Coordinator II for the Joint In-State Pipeline Development Team												
	PosAdj	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	1	0	0
Per HB 369, create a Program Coordinator II, Range 20 position in the Commissioner's Office to coordinate with the joint in-state pipeline development team in the evaluation of necessary environmental permitting, environmental impact statement review, Alaska Coastal Zone Management Program coordination, as well as compliance and enforcement activities for an in-state natural gas pipeline. This Anchorage based position is better suited in the Industry Preparedness and Pipeline Operations component and is being established here, rather than in the Commissioner's Office.

--------------	--	------	--	--	--	--	--	--	--	--	--	--

A major portion of the federal receipts budgeted in this component comes from the Environmental Protection Agency's grant for the Nonpoint Source Management Program of the Federal Clean Water Act. The funding for this federal grant has declined 17% since 2003. Due to this reduction, any additional increase in personal services cost from federal receipts cannot be realized. The federal grants for this program have not increased to absorb this additional cost. In order to address this deficit, the Department requests a fund source change to GFPR to cover these increased personal services costs. An increased GFPR collection is possible as a result of 2009 fee increases in the domestic wastewater systems program, which has since seen annual increases in collections due to permit renewals and collections on past due accounts.

Mining Permit Fees

1005 GF/Prgm	IncM	47.4	0.0	0.0	47.4	0.0	0.0	0.0	0.0	0	0	0
--------------	------	------	-----	-----	------	-----	-----	-----	-----	---	---	---

The Department of Environmental Conservation requests a fund source change of \$47.4 from Statutory Designated Program Receipts (SDPR) to General Fund Program Receipts (GFPR).

AS 37.10.052 allows the negotiation of fees with mining companies for water quality permit work. These fees are accounted for under SDPR. The recent trend is that the majority of these permits are now based on established fees and are therefore collected as GFPR. The Department proposes to transfer \$47.4 of this authority to GFPR where permitting fees are currently collected. The program will retain \$30.0 SDPR to cover potential negotiated mining contracts.

Contractual Assistance to the On-Site Wastewater Discharge Program

1005 GF/Prgm	Inc	60.0	0.0	0.0	60.0	0.0	0.0	0.0	0.0	0	0	0
--------------	-----	------	-----	-----	------	-----	-----	-----	-----	---	---	---

The Department requests \$60.0 in GFPR in order to provide contractual assistance to the On-Site Waste Water Discharge program in the Matanuska-Susitna Borough (Mat-Su) Office.

Communities in the Mat-Su rely almost exclusively on disposal of septic and industrial wastewater to the subsurface, with potential to pollute groundwater. Timely review of engineering plans and approval to construct and operate septic systems are critical to housing and business development. Roughly 40% of the plans received by the program are from the Mat-Su area. The Department proposes to use a contract engineering firm to augment existing staff's ability to monitor these systems in the Mat-Su Valley. Currently some drinking water system plans are not being reviewed due to lack of engineers in the program. With faster turnaround of the review requests, additional receipts will be generated to offset the cost.

Stormwater and Wastewater Permitting

1004 Gen Fund	Inc	82.0	58.5	5.0	11.5	7.0	0.0	0.0	0.0	1	0	0
---------------	-----	------	------	-----	------	-----	-----	-----	-----	---	---	---

The Division of Water will be responsible for issuing stormwater and other wastewater permits and variances, and for certification of federal permits for work in wetlands. Impacts on water quality both during and after construction will be a significant topic examined in the Environmental Impact Statement (EIS). For FY2012, a full-time Environmental Engineer II is needed for one-half of the fiscal year to participate primarily in the EIS development and pre-permitting processes.

Correct Unrealizable Fund Sources for Personal Services Increases												
	FndChg	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1002 Fed Rcpts		-25.1										
1005 GF/Prgm		26.9										
1075 Clean Wtr		-1.8										

A major portion of the federal receipts budgeted in this component comes from the Environmental Protection Agency's Remote Worker Maintenance grants. The federal grants for this program have not increased to absorb this additional cost. In order to address this deficit, the Department requests a fund source change to GFPR to cover these increased personal service costs. Based on the GFPR collections in the last three years, where collection has exceeded or met authorization levels, additional authority would allow the Division to realize this revenue.

Reclass PCN 18-N09003 Environmental Engineering Associate I Non-Permanent to Full-Time

	PosAdj	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	1	0	-1
--	--------	-----	-----	-----	-----	-----	-----	-----	-----	---	---	----

The Department requests a time status change from a budgeted long-term non-permanent Maintenance Specialist to a permanent full-time Environmental Engineering Associate for PCN 18-N09003. The duties and the status of the existing non-permanent position do not reflect the current needs of the program and do not allow the Department to recruit for staff with the skills and experience needed for managing the projects.

The number of new projects funded by the Municipal Grants and Loan Program (MGL) from FY 2000 to FY 2007 averaged 37 per year. From FY 2008 to FY 2011, the program now averages 66 projects per year. There are currently over 325 active sewer and water projects throughout the state with funding ranging from under \$100,000 to over \$10 million that require attention by MGL Project Engineers. There have been no new positions added to this program in five years yet the program demand has doubled in that time.

The Department expects the Alaska Drinking Water Fund (ADWF) and Alaska Clean Water Fund (ACWF) congressional appropriations for the State's grants/loans to continue to increase in order to address the country's aging infrastructure.

This Environmental Engineering Associate I (Range 21 in Anchorage) will work with municipalities to construct sewer and water systems and to ensure sufficient oversight to protect state investments. The position will ensure that the communities meet the funding requirements and the project performance goals established by the federal funding agencies.

Reclass PCN 18-N09004 Grants Administrator II Non-Permanent to Full-Time

	PosAdj	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	1	0	-1
--	--------	-----	-----	-----	-----	-----	-----	-----	-----	---	---	----

The Department requests a time status change from a budgeted long-term non-permanent Maintenance Specialist located in Anchorage to a permanent full-time Grants Administrator II located in Juneau for PCN 18-N09004. The duties and the status of the existing non-permanent position do not reflect the current needs of the program and do not allow the Department to recruit for staff with the skills and experience needed for managing the projects.

This vacant non-permanent position has been in the Division's budget since 2008 and can be used to fill an important staffing need, but cannot do so in the current job class.

The number of new projects funded by the Municipal Grants and Loan Program (MGL) from FY 2000 to FY 2007 averaged 37 per year. From FY 2008 to FY 2011, the program now averages 66 projects per year. There are currently over 325 active sewer and water projects throughout the state with funding ranging from under \$100,000 to over \$10 million that require attention by MGL Project Engineers. There have been no new positions added to this program in five years yet the program demand has doubled in that time.

Department of Environmental Conservation

Component: Facility Construction (637)
RDU: Water (210)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP

The Department expects the Alaska Drinking Water Fund (ADWF) and Alaska Clean Water Fund (ACWF) congressional appropriations for the State's grants/loans to continue to increase in order to address the country's aging infrastructure.

This Grants Administrator II will work with the communities to issue loans and grants, process timely reimbursements, report to the federal funding agencies, and focus on the on-going management and administration of the loans and grants.

Fund Source Change for Alaska Clean Water Funding

FndChg	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1002 Fed Rcpts	68.7											
1075 Clean Wtr	-68.7											

The Department of Environmental Conservation requests a fund source change of \$68.9 from the Alaska Clean Water Fund (ACWF) to federal receipts.

The set-aside portion of the ACWF grant is allowed to be drawn directly from the federal grant to pay for administering the program. This change allows streamlining of accounting by directly drawing down from the federal grant rather than making deposits into the ACWF fund and then transferring the funds to the operating budget.
