<b>ADN 10-0-5081 Reclass PCN 10-0424 from Acct. Tech III to Acct. IV Approved 2/2/10</b>												
	PosRecl	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
PCN 10-0424 was reclassified from an Accounting Tech III to an Accountant IV. This was approved by OMB 2/2/2010.												
<b>ADN 10-1-5018 Transfer IA Receipts from Personal Services to Services</b>												
	LIT	0.0	-40.0	0.0	40.0	0.0	0.0	0.0	0.0	0	0	0
This transfer of IA receipts is needed to cover essential ongoing operating costs for the component related to the increases in core services costs (Telecom, ETS computer services, training and travel office fees, and audit functions). IA receipts are generated thru indirect cost recovery and are available to fund operating costs.												
The authorization is available for transfer from personal services due to vacancies (both current and anticipated) within the component which will allow the vacancy factor to be met and excess personal services to be available for FY11. Vacancies as of August 31, 2010 include the Division Director, an Accountant III, and an Accounting Tech II.												
If this transfer is not approved the Admin Services component will be unable to meet continuing and essential financial obligations for day-to-day operations.												
It is anticipated that the Department will request an IA increment in personal services as part of the FY12 Governor's request since it is expected that the existing and anticipated vacancies will all be filled. The component has been able to carry forward sufficient IA receipts to allow for an increase in IA authorization.												
<b>ADN 10-1-5002 Time Status Change for PCN 10-0416 Part-Time to Full-time</b>												
	PosAdj	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	1	-1	0
This position provides administrative support for the Juneau office of the Support Services Division and the Director. This position is also available to assist with administrative support services as needed by the Juneau offices of the Commissioner, the Division of Parks, and the Division of Forestry.												

**Department of Natural Resources**

**Component:** Administrative Services (424)  
**RDU:** Resource Development (136)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP

Due to increased workload, we are asking to increase the hours for this position from 25 to 30 hours per week. The position provides assistance to the Support Services Division Director's Office, Finance Office, and Budget Office; the Legislative Liaison; and the regional office of the Division of Forestry. We have finally been able to keep someone in this position for more than 6 months, and with some longevity, the incumbent is able to take on additional tasks to the point that there is easily 5 more hours of work per week for this position. The workload is often requiring the incumbent to work extra hours, and we would like to follow this up by officially increasing the hours of the position and providing the additional employee benefits associated with a 30-hour position. This change will also make it easier to recruit and retain individuals in the position.

1004 Gen Fund		39.2										
1007 I/A Rcpts		-39.2										
The Administrative Services component relies on indirect cost recovery for a portion of the base budget. Indirect cost is collected as IA receipts from divisions for support work on non-general fund grants and projects such as federal grants and statutory designated program receipt agreements.												
The reduction in federal revenues across the department has limited the IA receipt collection in the Administrative Services component, and the DNR Finance Section advises that the amount available for collection is budgeted at the maximum level projected to be available. An increase in IA authority in FY12 is unrealizable, requiring a fund source change to allow the component to provide the same level of service to the department and other state agencies relying on their work.

 This position was created to oversee the Document Management Implementation Phase as well as the Post-Implementation Evaluation and Activities Phase of the Unified Permit Project. This phase is funded through 2015.

IRM had originally planned to hire contractors to complete the Document Management Implementation phase for this project. After reviewing costs associated with the completion of this project, it was determined that a long-term non-perm was a more cost effective option.

This RP is currently awaiting OMB approval. Submitted 8/5/2010

1007 I/A Rcpts		-158.3										
Historically, the components of the Division of Mining, Land and Water (MLW) have entered into a reimbursable service agreement (RSA) with Information Resources Management (IRM) for computer network and desktop support. In FY11 Management Plan, the general funds and land disposal income funds that MLW used to fund the RSA were transferred to IRM to directly fund the work and move away from a soft funding model. The interagency receipt authority needed for the RSAs is no longer required and will be decremented from the budget.												
<b>Decrement Unused Federal Authority</b>												
	Dec	-8.2	-8.2	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1002 Fed Rcpts		-8.2										
This change record deletes unused federal authority. This funding has not been received since FY2009 and will likely not be received in the future.												
<b>Decrement SDPR for Reduction in Data Extraction for Vendors</b>												
	Dec	-9.5	-9.5	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1108 Stat Desig		-9.5										
This reduction in Statutory Designated Program Receipts (SDPR) is to reflect the reduction in data extraction work requested by vendors.

In 2009, Pacific Energy Resources Ltd. (PERL) abandoned Redoubt Unit as a result of bankruptcy. The bond, in the amount of \$6,600,000 along with interest earned, for abandonment liabilities for the Redoubt Unit between PERL and DNR, Division of Oil and Gas was transferred to DNR in October 2009.

The assets were purchased in December 2009 by Cook Inlet Energy (CIE). The remaining funds from the original bond will be used as a part of the new bond posted by CIE. This bond will be used toward abandonment and reclamation if CIE abandons the facilities or begins reclamation.

The original bond was held in an escrow account at First National Bank, where interest was earned on the principle. However, it cost over \$1,800/mo in bank fees to hold the money in escrow. The department would prefer to hold the bond in Treasury. Interest earnings on the bond would then require an annual appropriation to the bond.

DNR requests that the interest earned be applied to the bond. The earned interest would maximize the value of the bond funds available for abandonment and reclamation costs.

Interest earned is expected to be \$175,000 in fiscal year 2010. CIE will pay an estimated additional \$175,000 into the bond account.

Over the next six years the Bureau of Ocean Energy Management, Regulation & Enforcement (BOEMRE), formerly the US Mineral Management Service (MMS), needs to complete eight environmental impact statements (EIS's) that will address the impacts of proposed outer continental shelf (OCS) oil and gas leasing and exploration activities in Alaska's offshore waters. DNR has an opportunity to partner with BOEMRE to develop the EIS's thereby ensuring that concerns of Alaskan's are addressed.												

RSA funding was made available to the division in October 2010.

<p>This request funds the ongoing need and cost of outside legal counsel and experts for reopen arbitrations as the state proceeds with renegotiation and arbitration of royalty issues, as well as other activities to optimize state royalty value. These "reopeners" offer the state and its lessees the opportunity to resolve disputes over royalty value, keep royalty settlement agreements up-to-date, and avoid costly and time-consuming litigation. Contractors are hired directly by DNR or through the Department of Law to represent the state's interests in the arbitrations.</p> <p>The Division of Oil and Gas anticipates several royalty disputes in FY12 that may require arbitration or litigation. In one particular case now underway involving the Federal government, there is over \$100 million dollars in potential royalty dollars for the State of Alaska. The division needs expert witnesses and outside counsel in order to be able to effectively support the State's position and fund litigation.</p> <p>This budget item has been previously funded as a one-time item (OTI). In the FY11 budget, it was reduced from \$500,000 to \$200,000. This OTI is being requested in conjunction with an increment to maintain services for the \$200,000 that was in previously in the budget. Together, these increases will restore the arbitration funds to the original \$500,000 for FY 2012.</p>												
<b>AGIA Commercial Monitor and Advisor</b>

1004 Gen Fund		800.0										
<p>This request will enable the state to secure expert advice from parties familiar with the commercial requirements associated with launching major new gas pipeline projects. This expertise is needed on two fronts. First, as the project and commercial arrangements with shippers mature, the state will need to ensure that any changes to the commercial terms initially proposed in the licensee's AGIA application comply with the license terms. Second, the state will need assistance from those with midstream commercial and financial expertise to develop, support, and maintain the state's position – especially in the context of future possible negotiations with the North Slope producers.</p>

1004 Gen Fund		1,290.0										
This funding is needed to maintain the current staff level and operational costs to adequately support and facilitate the permitting process for the Alaska natural gas pipeline under AGIA. Without the current staff level, monitoring of compliance under the AGIA license as well as facilitation of the complex permitting process will not be possible.												
Travel funds are needed for project coordination, permitting and license monitoring, and to meet monthly with TransCanada and ExxonMobil representatives in both Calgary, Alberta Canada and Houston, Texas. Additionally, close coordination with federal and Canadian agencies will require travel to be successful. Without these funds, we will not be able to meet this demand and the progress of the project will suffer.												
Services funds are needed to cover the costs of leasing office space and inter-agency billings for IT, telecommunications, and mail/courier support. Without these funds, an office cannot be maintained which will leave the AGIA staff unable to perform their duties.												
<b>AGIA Contractors/Consultants</b>												
	Inc	1,150.0	0.0	0.0	1,150.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		1,150.0										
The requested funds will cover costs associated with implementing the Alaska Gasline Inducement Act (AGIA) and fulfilling the state's responsibilities as per the terms of the license agreement with TransCanada Alaska. Maintaining the state's current level of technical understanding and project support is essential to success. These funds would be used to retain outside experts and consultants for continued gas pipeline analysis including acquisition of baseline data, pipeline engineering (practices and analysis) and design, gas treatment plant design, engineering, and operation, cost overruns, enforcement, remedies, and off-ramps for the licensee and state as well as technical licensee reimbursements audit support. Consultants will also provide expertise regarding federal project support including federal loan guarantees and the effects of environmental regulation.												
<b>AGIA Public Information and Participation</b>												
	IncM	377.5	0.0	95.5	186.5	95.5	0.0	0.0	0.0	0	0	0
1004 Gen Fund		377.5										

Local Outreach - Funds will be used to keep local communities informed of current gasline activities and related projects that impact the areas along the gasline route. The gasline team and AGIA Coordinator's Office will use these funds for travel costs and supplies for town meetings, speaking engagements, and meeting with local governments and the public. Keeping citizens informed of gasline activities will help alleviate local concerns and streamline the project development process. Outreach will also help the AGIA Coordinator's Office stay informed of local concerns.

National and Federal Outreach - Funds will be used to raise awareness and educate the public nationwide on the national importance and impact of an Alaska

application for the Alaska CIAP program. The Alaska Coastal Impact Assistance Program (CIAP) grants total in excess of \$51 million and are difficult and complex in nature with overlapping federal and state fiscal years, multiple grants lasting for more than one year; and compliance with a multitude of differing state and federal regulations and requirements. Duties of this position include grant solicitation, evaluation, negotiation, approval, award, distribution of grant funds, monitoring and closeout. Provides information and technical assistance to grant applicants regarding program and budget content; monitors grant agreements to ensure compliance with state and federal regulations; facilitates and provides coordination and assistance to program staff and project applicants; monitors programmatic and fiscal progress; processes billings for payment; compares billings against project budgets to determine if costs are adequately documented, allowable and within budget; and approves payment. Knowledge of the CIAP program is critical in this position and reclassing the Grants Administrator (PCN 10-3507) to a flex position Grants Administrator I/II allows for adding increased responsibility as an incumbent becomes proficient in the program.

**Continued Cooperating Agency Status on Lease Planning with the US Bureau of Ocean Energy Mgt, Regulation and Enforcement**

	IncM	240.0	38.0	5.0	197.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		240.0										

Over the next six years, the U.S. Bureau of Ocean Energy Management, Regulation and Enforcement (BOEMRE)(formerly the MMS) will need to complete eight Environmental Impact Statements (EIS's) that will address the impacts of proposed outer continental shelf (OCS) oil and gas leasing and exploration activities in Alaska's offshore waters. In addition, the US Bureau of Land Management is starting an EIS for future resource development in NPRA. The EISs will address OCS leasing, exploration and development activities in the Chukchi and Beaufort Seas, Cook Inlet, and the North Aleutian Basin, and onshore oil and gas leasing and other resource development in NPRA. This budget request will allow the state to be a participant in these processes. Cooperating agency status will allow the State to partner with BOEMRE and BLM in developing these EIS's, thereby ensuring that the concerns of Alaskans are better addressed. State agency expertise will be critical in assisting BOEMRE and BLM to ensure that these EIS's are completed in a timely and thorough manner.

A DNR Project Coordinator and state agency review team will participate in identifying and resolving significant environmental issues; assist in preparing portions of each EIS document; provide BOEMRE and BLM an inventory of relevant information (e.g., GIS data, hardcopy and electronic datasets, maps, reports, etc.) that would be useful in identification and analysis of environmental data; provide data and rationale for analysis and assessment of alternatives; and participate with pertinent U.S. federal agencies such as the U.S. Corps of Engineers, U.S. Environmental Protection Agency, U.S. Fish and Wildlife Service,

										PFT	PPT	NP
and National Marine Fisheries Service in review of and comment on National Environmental Policy Act (NEPA) process documents.												
Funds included in this budget will be used to pay for personal service and travel expense in DNR's Office of Project Management and Permitting. The majority of the funds will be used to reimburse expenses of other participating state agencies including the Division of Mining, Land & Water, Division of Coastal and Ocean Management, Division of Oil and Gas, Office of History and Archaeology, and the Departments of Fish and Game, Law, Health and Social Services, and Environmental Conservation.												
Work on the EIS's is already underway. The State will be able to continue to participate as a cooperating agency with approval of this funding. Office of Project Management & Permitting is requesting to fund this project permanently.												
<b>Statutory Designated Program Receipts increased volume of funded agreements</b>												
	Inc	400.0	0.0	0.0	390.0	10.0	0.0	0.0	0.0	0	0	0
1108 Stat Desig		400.0										
The requested Statutory Designated Program Receipts increment will accommodate new mining and oil and gas permitting projects - Usibelli Coal Mine and the Izembek Environmental Impact Statement - as well as allow for Large Project Permitting (LPP) to accept Memorandum of Understanding (MOU) budget amendments for existing projects throughout the year. This is needed both to support the work of LPP and to distribute to other participating agencies via reimbursable service agreements.

The transfer of PCN 10-1347 Natural Resource Specialist II from Title Acquisition and Defense is needed in order to reconcile the organizational structure and budget of the Division of Mining Land and Water.												
<b>ADN 10-1-5033 Transfer funds to Information Resource Management for computer services desktop and network support</b>												
Trout		-81.9	0.0	0.0	-81.9	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		-81.9										
Transfer general fund from the Claims, Permits & Leases component to the Information Resource Management (IRM) component. This is GF the Division of Mining, Land & Water budgets and uses to pay the Information Resource Management (IRM) component for computer desktop and network support, traditionally through the RSA process. Transferring the general fund directly to the IRM component eliminates the need for the interagency transfer of funds and places the general fund directly in the component incurring the personal services charges.

**Reverse August FY2011 Fuel/Utility/Cost Increase Funding Distribution from the Office of the Governor**

	OTI	-1.5	0.0	0.0	-1.5	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		-1.5										

Pursuant to Ch41 SLA10 Sec22 P82 L25 through P85 L3, \$13.5 million is distributed in August to State agencies from the Office of the Governor to offset the increased costs for fuel and utilities. Per the Department of Revenue (DOR), the fiscal year-to-date average price of Alaska North Slope crude as of August 1, 2010, was \$76.53 per barrel, which is \$1.12 (1.4%) below DOR's Spring 2010 FY2011 forecast amount of \$77.65.

The amounts transferred to state agencies are as follows:

Administration, \$20.5; Corrections, \$540.0; DEED, \$51.5; DEC, \$34.1; Fish and Game, \$69.9; HSS, \$540.0; Labor, \$31.8; DMVA, \$294.6; DNR, \$61.2; DPS, \$246.5; Transportation, \$10,125.0; University, \$1,485.0.

**FY 2011 Over/Understated GGU/SU salary adjustments**

1002 Fed Rcpts		-229.3										
1007 I/A Rcpts		-219.0										
1108 Stat Desig		-85.4										
1154 Shore Fish		-40.0										

This transaction deletes unrealizable fund sources as follows:

Federal: \$229.3. The federal grant related to abandoned mine land reclamation has been received for a lesser amount than originally anticipated.

IA Receipts: \$219.0 This component frequently receives a number of reimbursable service agreements (RSAs) related to large mining projects. Many of the RSA funds are not able to be fully utilized as development of projects do not materialize as originally planned and the associated work is no longer required at the level originally anticipated.

Shorefish Receipts: \$40.0 This component collects shore fish permit fees. This program is growing, but has not grown as quickly as anticipated.

Statutory Designated Program Receipts (SDPR): \$85.4. This component collects SDPR revenue related to special agreements in which private industry or non-profit groups provide funding to expedite specific work or the Department of Law collects settlement funds from private industry to fund site clean up activities. While the division can not foresee all agreements that may be received or the amounts of those agreements, a portion of this fund source has been unrealized in recent years and it is not expected that collections will increase in upcoming years.

**Department of Natural Resources**

**Component:** Mining and Land Development (2460)  
**RDU:** Resource Development (136)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		NP
										PFT	PPT	
<b>Correct Unrealizable Fund Sources for Personal Services Increases</b>												
	FndChg	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1002 Fed Rcpts		-28.1										
1004 Gen Fund		63.2										
1007 I/A Rcpts		-13.1										
1055 IA/OIL HAZ		-0.7										
1108 Stat Desig		-7.2										
1154 Shore Fish		-14.1										

This component requests \$67.6 GF to replace unrealizable fund sources.

**Federal, \$28.1**

The Claims, Permits, and Leases (CPL) component anticipated and budgeted for potential federal mining grants which were not forthcoming. In FY10, CPL budgeted to collect \$946.3 in federal revenue, however only \$675.5 was received and expended. A decrement to reduce excess federal authority will be submitted as part of the FY12 Governor's budget for this component in the amount of \$377.5.

**GF Match, \$5.1**

Reduced federal funds affect the need for GF Match. The increase will not be utilized as match since the component will not be receiving the federal funds.

**IA Receipts, \$13.1**

The component typically receives a number of RSA's for Large Projects. However, many of the RSAs are for projects that do not fully materialize in the budgeted amounts (such as gas line projects) and are closed without being able to be fully utilized. In FY10, the component budgeted for \$521.0 in IA, but only \$258.4 was received and expended.

**Statutory Designated Program Receipts (SDPR), \$7.2**

The component occasionally receives SDPR receipts for special projects for the private industry or non-profit groups. However, it does not appear that the component will collect their full authority for SDPR in FY11 or any additional in FY12. In FY10, the component budgeted for \$209.3 in SDPR, but only \$75.4 was collected and expended. Any additional SDPR authority will be unrealized.

**Shorefish, \$14.1**

The component collects Shorefish revenue for shore fish permits. This program is growing, but has not reached a level to collect receipts at the current authorization level. The program does not anticipate the FY12 shorefish receipts will exceed the FY11 authorization level and the increase in authorization will not be realized.

The total of \$67.6 of unrealized funds in the component will lead to additional required vacancies in personal services in order to meet the budget if this fund change is not approved. The Division of Mining, Land and Water already requires an estimated 23 vacancies in order to meet the current FY11 budget and any additional vacancies will cause an increase to the growing backlog.

**Litigation Support to Defend Permitting Process on State Lands**

This increment will provide the Division of Mining, Land and Water (MLW) and the Department of Law with the resources necessary to defend DNR's permitting

**Department of Natural Resources**

**Component:** Mining and Land Development (2460)  
**RDU:** Resource Development (136)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP
<p>and planning processes that are the subject of current litigation. Opposition to the permitting for exploration on the mining claims comprising the Pebble Project continue to consume MLW and the Department of Law resources and funds. Organizations opposed to the project have filed multiple lawsuits targeting various facets of DNR's permitting process and the preparation of area plans.</p> <p>The increased litigation has required significant staff time from the director of MLW and multiple section chiefs and supporting staff. Litigation requires staff time to review or prepare responses, review briefs, prepare for and attend depositions, respond to documents and information requests and represent DNR during oral arguments. The effort required to respond to the multitude of record requests and prepare and present depositions consumes time from these positions and their supporting division staff that would normally be used to administer the ongoing programs and activities of the division. Additional funding is required to maintain the current service levels of the division (not related to preparation and response to litigation).</p> <p>The Department of Law has requested a reimbursable service agreement (RSA) from MLW to offset a portion of their personal services costs dedicated to representing the division during these various proceedings. The division of Mining, Land and Water does not have the resources to fund these additional costs associated with litigation.</p>												
<b>Public Land Stewardship including Mine Permitting, Compliance and Assessment</b>												
1004 Gen Fund	Inc	802.0	600.0	30.0	157.0	15.0	0.0	0.0	0.0	0	0	0

This increment funds existing vacant, unfunded positions responsible for managing and permitting public use and private development on state lands. There has been an increase in economic activities on state lands due in part to the 8 million acre increase of state land received as our Statehood entitlement through the Accelerated Land Transfer Act over the last five years. There has also been increased activity on all state land as a result of increased mineral exploration, new alternative energy projects, new telecommunications projects and an increase in public use of state lands.

One of the significant impacts from this increase of acreage under state management and increased economic development proposals on state land is the increase in lease and permit applications for use of state lands, both for economic development and recreational use. Many forms of economic development are controversial and require meticulous adjudication to address public, environmental and legal concerns. Rushed, non-comprehensive, adjudication leaves the state unable to adequately defend its decisions against legal challenges. With the current staff and funding model, the Division of Mining, Land and Water (MLW) continues to fall behind with the processing of applications from industry and individuals to use and develop state land. In FY10, 87% of new applications were processed, but the backlog of unprocessed applications continues to increase, and was at 2,376 at the end of FY10.

MLW has also seen a need for more rigorous permitting and oversight of mining activities. In the last five years there has been a dramatic rise in the number of placer mining operations, large scale metal mines, and large scale exploration programs. At the same time, public interest and concern about these activities has increased. DNR is currently defending several lawsuits regarding permits for mineral exploration. Increased on-site inspections at large mine projects are necessary to ensure permit compliance. The high volume of mining activities in 2010 resulted in permitting time for placer mining and mineral exploration activities of up to 6 weeks, far above the expected and desired time of 2-3 weeks. Timely and accurate processing and auditing is required to maximize mining revenues to the state. Increased travel costs have resulted in limited field inspections and technical assistance for miners.

In order to increase field presence without increasing the size of permanent state government employees, summer interns or short-term non-perms, under the supervision of current staff professionals, will be used to perform some field inspections and interface with the public.

Along with the increase in activities on state land the division has a constitutional and statutory responsibility to provide stewardship of these lands. Stewardship of state lands ranges from ensuring access for oil and gas development; to providing materials for infrastructure construction; to providing site-specific inspections of mineral development projects; and to interacting with the public where state lands are used for recreational purposes. Interaction with the public

## Department of Natural Resources

**Component:** Mining and Land Development (2460)

**RDU:** Resource Development (136)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP

in areas of high recreational use consists of trash removal, providing public information (such as signage, web sites, maps) , clearing timber and brush, or resolving damage and unauthorized use of state land. In areas of high use, such as the Rex trail in the interior, these funds could be used by the division to contract experts to develop prescriptive analysis to aid in trail rehabilitation.

Five existing positions that have been held vacant due to the lack of funding will be used to provide the ongoing management and permitting responsibilities for public use and private development on state lands. In addition to personal services costs, this increment covers the travel (site-specific mining inspections and recreational use area management), services (such as contracts for trail rehabilitation) and commodities costs associated with managing the public and private uses of state land.

**Guide Concession Area Program**

1004 Gen Fund	Inc	120.0	95.0	15.0	0.0	10.0	0.0	0.0	0.0	0	0	0
---------------	-----	-------	------	------	-----	------	-----	-----	-----	---	---	---

This increment request provides funds for continued development of the Guide Concession Area Program. The guiding industry has asked that DNR consider implementing a concession program to authorize commercial hunting guides to work within specific areas of the state to reduce the overall hunting pressure throughout the state of Alaska. For over two years, the Division of Mining Land and Water (MLW) has been working with existing staff members to initiate the development of this program, with funds provided by the legislature specifically for this project.

This program will offer big game guides the ability to competitively apply for and be awarded authorizations to run a business on state land if selected, but will limit the number of guides running businesses on state land. The program is anticipated to provide a net return to the state, will not affect any other users of state land (private or commercial) and has been discussed and reviewed by the public and agencies. MLW has committed to another round of public review and comment regarding the planning of the areas, developing procedures and regulations that will be needed to fully implement the program in FY13.

This increment combined with the existing \$120.0 (total of \$240.0) will allow MLW to continue the development of the Guide Concession Area Program. Once fully operational, it is anticipated that the program would be funded (at least partially) by general fund program receipts.

**Coal Regulatory Program Staffing to comply with Federal Office of Surface Mining**

1002 Fed Rcpts	Inc	52.0	93.5	4.5	5.0	1.0	0.0	0.0	0.0	0	0	0
1003 G/F Match		52.0										

This request funds existing PCN 10-1846, Natural Resource Specialist III. The position is required within the Mining Program to meet requirements for maintaining federal grant funds for the Coal Regulatory program as follows:

The Division of Mining, Land and Water (MLW) is seeking to increase the staffing level (using this existing, unfunded position) of the Coal Regulatory and Inspection Program to meet an increased workload and comply with a request by the federal Office of Surface Mining (OSM) to maintain adequate staffing for this program.

In the past three years two new projects have entered the permitting process, there is a renewed interest in the start-up of the Wishbone Hill mine, and there is an increase in the amount of exploration. In addition to the inspection and permitting of conventional coal mining, all aspects of underground coal gasification (UCG) are under the authority of the Coal Program. One company is actively drilling targets for UCG and a second company is acquiring coal leases and plans to submit exploration permits in the next year. This has increased the amount of public involvement and also resulted in filing of three "lands unsuitable for mining" petitions. In addition to the permitting work required to review these projects, staff is also required to perform monthly site inspections of all active

ISSUE

The state's land base has increased by 8 million acres over the last five years, and the Division of Mining, Land and Water has not been able to keep up with the increasing number of applications to use this land. The division now has a backlog of over 2,300 applications. Through a combination of restructuring the permitting process and additional staff, the backlog will be significantly reduced, and eventually eliminated.

BACKGROUND

The Division of Mining, Land and Water is requesting an FY2012 amendment of \$1,421.0 to eliminate a backlog of land and water use authorizations. With this amendment, the division will establish six new positions, and fund five vacant positions. With these positions, the division will work to streamline and make more efficient the current permitting processing ability, and eliminate the backlog that impedes economic development and use of state land.

At the beginning of FY2011, there was a backlog of approximately 2,300 applications that had not been issued. This includes applications for permits (314), leases (297), easements (658), material sales (181), water rights (600), and instream flow reservation applications (330).

The current capacity to process all types of land and water use applications is 97 positions, of which 13 are unfunded and vacant. The personal services budget for the 84 filled positions is \$7,462.0.

This backlog of applications has been growing in recent years because the division has only been able to process 87% of all incoming applications. This is due to a number of reasons:

- Inefficient internal processes and cumbersome regulatory requirements.
- Land ownership patterns have become more complex, thereby increasing the conflicts that have to be resolved.
- Increasing federal and municipal regulation has increased the processing time for applications.

## Department of Natural Resources

**Component:** Mining and Land Development (2460)  
**RDU:** Resource Development (136)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP

- Increasing appeals and litigation of our authorizations, which delay and complicate processing.
- An additional 8 million acres of land transferred to state ownership within the last five years, resulting in an increase in the number of applications to use that land.

The backlog of applications range in complexity from very basic authorizations such as a commercial recreation permit that can be issued within a day, to large projects requiring multiple interrelated authorizations, multi-agency coordination, required studies and review that may take a few years to complete the authorizations. Each specific application may present an assortment of obstacles that can vary the processing times such as land ownership disputes, multiple use conflicts, business transaction delays, unresponsive applicant, encumbrance removal, project revisions, appeals and litigation.

The following table shows the applications received, quantity issued, and the backlog for each of these types of authorizations in FY2010:

FY2010 Performance Measures			
Authorization Type	Appl Rec'd	Qty Issued	Backlog
Land Use Permits	299	340	314
Land Leases	64	64	297
Easements	44	23	658
Material Sales	44	50	181
Water Rights	71	49	600
Instream Flow Res	13	8	330
<b>Totals</b>	<b>722</b>	<b>702</b>	<b>2,380</b>

### WORKPLAN

Goal: To timely process all incoming land and water use applications, and to eliminate the backlog.

#### Strategies:

- With the increased staffing, process 100% of all incoming applications (currently we can only process 87% of all incoming applications).
- The increased staffing, coupled with increased permitting efficiencies, will allow processing of at least 250 backlogged applications annually, with anticipated subsequent dramatic improvements through additional increased permitting efficiencies.
- The division will focus first on applications that foster economic and community development and improvement of state infrastructure, and provide opportunities for energy cost reduction, jobs, and contracts. Applications will be prioritized to work on projects that provide the most benefit to the highest number of Alaskans.
- The division will conduct a comprehensive review of the division's permitting processes, and we will find and implement changes that will increase efficiency. Areas that the division will evaluate include:
  - Organizational changes (e.g. formation of permitting teams) within the division.
  - Applicable statutes and regulations.
  - The regulatory relationship between the state, and federal and local governments.

## Department of Natural Resources

**Component:** Mining and Land Development (2460)  
**RDU:** Resource Development (136)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP

- Appeals process.
- Contracting with the private sector.

- Develop computerized systems to automate and speed up the permitting process. The Department is developing a unified permitting system which will significantly increase permitting productivity by automating the permit processing, allow applicants to apply on line, and allow staff to better process and track applications.

This increment adds funding for six new Natural Resource positions and five existing unfunded positions.

Five new Natural Resource positions are needed to process and manage these backlogged authorizations: one in Fairbanks for Interior Alaska, one in Juneau for Southeast Alaska, and three in Anchorage for Southcentral Alaska. Substantial progress on applications critical for development projects will be realized in FY2012 and beyond. One new Natural Resource Specialist will be added in Southcentral to take care of the assignments, billing, and ongoing administration of the authorizations. This increment also funds three existing Natural Resources Specialist II positions (PCN 10-1380, 10-1859 and 10-8255) in the Southcentral Region Land Office under the Easement Unit that are vacant due to inadequate funding.

In addition, this amendment includes funding for an Administrative Assistant II (vacant PCN 10-1767), transferred from the Land Acquisition and Title Defense component. This position will support the division's administrative functions in the efforts to improve our efficiency. A Natural Resource Specialist III (PCN 10-1852) is transferred from the Land Sales and Municipal Entitlements component to concentrate more on general easement applications and easement management rather than just those for land sales.

This amendment also provides support costs for the positions including additional travel funding for inspections, compliance and monitoring of activities – many of which are located in remote areas off the road system or in congested areas which requires field information to understand issues when considering competing or diverse types of application within the same general area. Inspections, compliance and monitoring require both travel costs and contractual expenses for helicopter and aircraft charters. The increment also includes funding for the additional office and parking garage lease space costs, core services costs (such as charge-backs to DOA for telecommunications, computer services and human resources support), equipment and supplies.

### Summary of Positions -

#### Existing:

- 3 - Natural Resource Specialist IIs (PCN 10-1380, 10-1859 and 10-8255)
- 1 - Administrative Assistant II (Vacant PCN 10-1767, Transfer from Land Acquisition and Title Defense)
- 1 - Natural Resource Specialist III (PCN 10-1852, Transfer from Land Sales and Municipal Entitlements)

#### New:

##### Southcentral:

- 1 – Natural Resource Manager I (10-#264)
- 2 – Natural Resource Specialist II (10-#265, 10-#271)
- 1 – Natural Resource Specialist I (10-#266)

##### Northern:

- 1 – Natural Resource Specialist II (10-#262)

##### Southeast

- 1 – Natural Resource Specialist II (10-#263)

1002 Fed Rcpts -69.2												
1007 I/A Rcpts -17.9												
1108 Stat Desig -60.4												

This change record "cleans up" fund sources and decrements unrealizable fund sources for the Land Sales and Municipal Entitlements Component as follows:

Federal Receipts: \$69.2 This component did not receive any federal grants in FY10 or FY11 and does not anticipate receiving any federal funding in FY12.

I/A Receipts \$17.9 This component typically does not receive any reimbursable service agreements and does not anticipate receipt of any RSAs in FY12.

Statutory Designated Program Receipts: \$60.4 In the past, this component has charged municipalities to process high priority municipal conveyances to augment funding for the work. Work of this kind has not been done for municipalities (and therefore the funds not collected) since FY06 and is not anticipated in FY12.

**Land Sales and Municipal Entitlements Staff Funding for Southeast AK Region**

1153 State Land	Inc	105.0	90.0	10.0	0.0	5.0	0.0	0.0	0.0	0	0	0
-----------------	-----	-------	------	------	-----	-----	-----	-----	-----	---	---	---

This increment provides funds to maintain an existing, unfunded position to perform essential work related to general land grant entitlements and implementation of the land disposal program within southeast Alaska.

One of the essential functions of the Southeast Regional Office is the adjudication of general land grant entitlements of the boroughs and unified municipalities in southeast Alaska and the implementation of the state land disposal program for the region. The southeast regional office is tasked with the responsibility of processing the municipal entitlements of the Haines and Wrangell Boroughs. Timely conveyance of these requests are crucial to sustaining the economic vitality of these communities and triggers economic growth and ultimately provides additional employment opportunities.

Due to budget shortfalls, the southeast region does not have funding to pay for staff to adjudicate municipal entitlements. Under current circumstances, incoming entitlement requests will have to wait on existing staff already charged with the: i) processing of leases, permits, and easements applications, and ii) monitoring activities on state owned land in southeast Alaska. This heavy workload does not allow for the timely conveyance of municipal entitlements. It is essential for the southeast regional office to have an individual on staff that is dedicated to adjudicating municipal entitlement requests that are far from routine and have a unique set of issues that must be resolved before coming up with an acceptable end product.

**Increase Personal Services Authority from Land Sales Capital Projects**

1061 CIP Rcpts	IncM	400.0	400.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
----------------	------	-------	-------	-----	-----	-----	-----	-----	-----	---	---	---

This increment budgets for CIP authorization being used for existing positions performing work related to Land Sales capital projects.

The CIP authorization requested for this increment comes from capital projects received over the last three years for survey and design work associated with land sales. Due to the high vacancy rate that has been maintained in the Land Sales section because of funding shortfalls, preparation work on additional subdivisions has not progressed at a rate that would allow these projects to mature to the point that lots could be offered for sale. In order to keep sufficient subdivision lots in the queue, it is necessary to budget CIP authorization for personal services costs to provide sufficient finding to continue to development of subdivision sales. These funds pay for positions performing area planning efforts necessary to designate lands for disposal, project design and survey and construction contract issuance in the survey units, adjudicator positions preparing Final Findings, conducting public notice and meetings to determine project parameters, confirming title, executing and maintaining land sales contracts, and issuing patent.

**Realign Line Items to Reflect Spending Plan**

LIT	0.0	200.0	0.0	-200.0	0.0	0.0	0.0	0.0	0.0	0	0	0
-----	-----	-------	-----	--------	-----	-----	-----	-----	-----	---	---	---

Costs related to the Remote Recreation Program Cabin Sites (RRCS) program have shifted as the program has developed. A RRCS offering takes 7-8 years to complete. Now that the program has been fully implemented, there are RRCS offerings at every stage of the 7-8 year cycle during each fiscal year which increases the necessary staff time.

In the early years of RRCS, an average of 10 areas was offered each year. This has dropped in recent years to 4-5 areas. This reduces the amount of authority needed in the services line leaving the excess available to transfer to personal services.

This line item transfer will better reflect the current spending plan.

\*\*\*\*\* **Changes From FY2011 Management Plan To FY2012 Governor** \*\*\*\*\*

**Decrement Unrealizable Funds**

	Dec	-439.1	-383.4	0.0	-55.7	0.0	0.0	0.0	0.0	0	0	0
1007 I/A Rcpts		-100.0										
1061 CIP Rcpts		-339.1										

This change record decrements unrealizable funding for the Land Acquisition & Title Defense Component as follows:

CIP: (\$339.1)

This component does not anticipate any CIP receipts in FY12. Past CIP receipts have been related to federal grant capital project funds from the Bureau of Land Management which were eliminated due to funding shortfalls within the agency.

IA: (\$100.0)

This component occasionally receives small reimbursable service agreements from other state agencies for title research work. This component has not fully collected these receipts in past fiscal years. This decrement will bring IA authority to down to a level that is closer to what is reasonably anticipated for this fund source.

**Delete Uncollectable Federal Receipts for Land Transfer Oversight Including Native Allotments**

	Dec	-671.0	-618.8	-10.0	-37.2	-5.0	0.0	0.0	0.0	0	0	0
1002 Fed Rcpts		-671.0										

Due to reductions and funding shortfalls in the federal Bureau of Land Management (BLM) budget, the BLM eliminated grants that had historically been provided to this component for land acquisition work related to the statehood act and completion of Alaska's acquisition of federal land entitlements. These federal funds will no longer be received in the operating or capital budget.

For the Division of Mining, Land and Water to continue this land acquisition work, a corresponding increment request for general funds is included in the component's FY12 Governor's budget.

**Department of Natural Resources**

**Component:** Land Acquisition & Title Defense (2459)  
**RDU:** Resource Development (136)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP
<b>Oversight of Federal Land Transfers including Native Allotments, ANCSA Conveyances, and Survey Reviews</b>												
	Inc	671.0	618.8	10.0	37.2	5.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		671.0										

This increment will cover personal services costs for existing vacant, unfunded positions, and allow DNR to: resume adjudication of 1906 Native Allotment reconveyances previously halted when federal funding was discontinued; allow DNR to resume review of Alaska Native Claims Settlement Act (ANCSA) conveyances to protect public access and state ownership interests (including navigability); and provide for work on other ANCSA conveyance documents and cases including 17(b) access.

Regarding Native Allotments, the state is obligated to adjudicate for reconveyance 270 parcels of state land to the federal Bureau of Land Management (BLM) that were erroneously conveyed to the state. The state suspended work on these reconveyances in FY 11 because of funding shortfalls. Similarly, in past years the state has reviewed dozens of conveyances to ANCSA Corporations to ensure that public access is maintained to public lands.

Continued funding for positions to do this work will alleviate various inquiries from constituents, applicants, and other governmental agencies to legislators, the governor and commissioner by allowing the Division of Mining, Land and Water (MLW) to continue processing the Bureau of Land Management's native allotment reconveyance requests and requests for state selection relinquishments of those areas affected by valid native allotment applications. Federal funding cuts for the BLM 2009 program, effective in FY10, effectively eliminated the ability to continue this work.

This component reviews approximately 386 ANCSA conveyance documents produced by the BLM. These documents affect access to public lands, land ownership patterns and future state entitlement selections. It is the responsibility of this component to make sure that actions taken by the BLM with regard to fulfilling the ANCSA land entitlement do not harm the state either by conveying lands to corporations where the state already holds title, restricting access across corporation lands to other public lands and that state in-holdings do not develop as part of incomplete adjudication at the BLM.

Another task that this increment will fund is continued work on setting the state's priorities for land conveyances and relinquishments. In the past 5 years, the state has received an additional 8 million acres from the federal government. An additional 5 million acres are owed the state, but the state has far more selections remaining. Under federal law the state is allowed a 25% over-selection. This increment will allow the state to continue to identify lands for conveyance and relinquishment. If the state fails to do this work, decisions about relinquishment will be made by the federal government, rather than the state.

This increment will also fund land survey reviews to ensure they are adequate under state statute for land conveyances made by DNR. The MLW Survey Section determines whether land surveys are adequate under the requirement of AS 38.04.045 for land conveyances made by DNR. Where surveys are required, the Unit issues instructions to private sector land surveyors. The Unit serves as the watchdog for BLM surveys to insure that they meet required standards, and protect state's interests in areas such as navigable waters and existing easements.

**Transfer Out Natural Resource Spec I to the Mining and Land Development Component PCN 10-1846**

										PFT	PPT	NP

an increased workload and to maintain adequate staffing levels as requested by the federal Office of Surface Mining (OSM). In the past three years two new projects have entered the permitting process, there is a renewed interest in the start-up of the Wishbone Hill mine, and an increase in the amount of exploration. In addition to the inspection and permitting of conventional coal mining, all aspects of underground coal gasification (UCG) are under the authority of the Coal Program. One company is actively drilling targets for (UCG) and a second company is acquiring coal leases and plans to submit exploration permits in the next year. This has increased the amount of public involvement and also resulted in filing of three "lands unsuitable for mining" petitions. In addition to the permitting work required to review these projects, staff is also required to perform monthly site inspections of all active projects. Because of the small size of the program, each of the professional staff must conduct permit reviews as well as perform inspections.

Current staffing levels have remained relatively unchanged since 2001 at around 3.5 FTE, with three people devoted to permitting and inspection. This was the minimum number to meet the needs in 2001 and it has not been adjusted for the increased workload. Coal mining operations are regulated under a federal program that the State of Alaska has maintained primacy over since 1983. The Office of Surface Mining (OSM) conducts oversight of this program. A recent review of staffing levels by OSM determined that current staffing levels are inadequate to meet the workload. The department has been reminded by OSM that maintaining adequate staffing is a requirement for maintaining primacy over the federal program.

**Correct Unrealizable Fund Sources for Personal Services Increases**

	FndChg	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	PFT	PPT	NP
		0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1002 Fed Rcpts		-25.4										
1004 Gen Fund		32.2										
1061 CIP Rcpts		-6.8										

This component requests \$32.2 GF to replace unrealizable fund sources.

Federal, \$25.4 and CIP, \$6.8

Due to funding shortfalls, the Bureau of Land Management eliminated grants that had historically been provided to this component for land acquisition work. These federal funds for land acquisition work will no longer be received in the operating or capital budget. A requirement remains for this component to complete land acquisition work related to the statehood act and completion of Alaska's acquisition of federal land entitlements. A request to replace \$671.0 of federal authority with general funds will be included in the component's FY12 Governor's budget. Additionally, the component will be requesting a decrement of \$338.1 in CIP receipts as a result of the elimination of capital projects for BLM land acquisition.

In FY11, the Division has been forced to hold vacancies open to stay within available funding. If unrealizable fund sources are not replaced, the component will not have sufficient funds available to fill vacancies and address workload requirements in FY12.

1004 Gen Fund		275.0										
1005 GF/Prgm		-110.0										
1061 CIP Rcpts		-136.5										

This change record requests fund changes to replace unrealizable receipts in the Water Component as follows:

Federal Receipts: \$28.5

In FY10, Water Development budgeted for \$46.0 in Federal, but only \$5.7 was collected and expended. This component received a small federal grant for \$30.1 in FY11. However, it is not anticipated that any additional federal grants will be received in FY12.

CIP Receipts: \$136.5

This component does not anticipate CIP Receipts for FY12 personal services costs. Current CIP projects administered by this component are limited to those related to U.S. Geological and Survey pass through agreements .

**Department of Natural Resources**

**Component:** Water Development (916)  
**RDU:** Resource Development (136)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		NP
										PFT	PPT	

General Fund Program Receipts: \$110.0

This component collects General Fund Program Receipts for water rights, water use, and dam safety application fees. This component has historically not collected these application fees at the levels previously estimated and GF is being requested to replace the estimated unrealizable portion of these receipts for FY12.

(Note: These fees were previously authorized as RSS, but this fund source was changed to GFPR in FY11 Budget. )

Filing for and receiving a water right permit is the only way that a land owner can legally obtain and protect a specified volume of water for domestic or industrial purposes. Without this permit use of water cannot be protected from other users of the same water source.

Without a temporary water right permit an organization cannot use a significant amount of water from a surface or ground source or face penalties under AS 46.15.180. Violation of this statute could lead to loss of a mineral exploration permit which would halt exploration activity. Loss of an exploration permit could halt or significantly delay a mining, power or construction project. Delays in exploration activities have potential to shelve projects that are economically advantageous to the state and surrounding communities.

If these fund switches are not approved, the component will be forced to hold vacancies open to stay within the budget. However, workloads continue to grow and lack of available funds to fill positions impacts services to the public which includes a growing backlog of water rights and other permit applications. If unrealizable fund sources are not replaced, this component will not have sufficient funds available to fill vacancies and address backlogs in FY12.

**Move PCN 10-2142 from Anchorage to Fairbanks**

PosLoc	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
--------	-----	-----	-----	-----	-----	-----	-----	-----	-----	---	---	---

This change record is to request OMB approval to change duty location of PCN 10-2142 from Anchorage to Fairbanks. PCN 10-2142 is currently vacant. The change of location from Anchorage to Fairbanks is related to a need to reclassify the position from a Hydrologist II (R18) to a Natural Resource Specialist II (R16). The division has identified the need for this change based on an increased workload in Fairbanks related to mining issues and permitting backlog.

Federal, \$0.4

In FY10, Water Development budgeted for \$46.0 in Federal, but only \$5.7 was collected and expended. It is not anticipated that any additional federal funds will be collected in FY12 and any additional federal authority would be unrealized. The component is requesting a decrement of \$28.5 in federal funds as part of the FY12 Governor's budget.

GF Program Receipts (GF/PR), \$15.2

The component has historically budgeted GF/PR (formerly RSS) to accommodate small dam safety applications and water use permits that have been received. In FY10, the component budgeted \$310.3 for these activities, but only \$231.9 was collected and expended. It is not anticipated that any additional GF/PR authority will be realizable.

**Department of Natural Resources**

**Component:** Water Development (916)  
**RDU:** Resource Development (136)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP
IA Receipts, \$2.5 The component typically receives RSAs for large mining projects, but these RSAs have not been materializing as budgeted. It is not anticipated that additional RSAs will be available to accommodate any increase in IA authority.												
Statutory Designated Program Receipts (SDPR), \$2.7 The component budgets SDPR to accommodate large dam safety application fees and associated oversight work. In FY10, the component budgeted for \$118.2 of SDPR, but only \$56.2 was collected and expended. Any additional authority in FY12 will be unrealized.												
If these fund switches are not approved, the component will be forced to hold vacancies open to stay within the budget. However, workloads continue to grow and lack of available funds to fill positions impacts services to the public which includes a growing backlog of water rights and other permit applications. If unrealizable fund sources are not replaced, the component will not have sufficient funds available to fill vacancies and address backlogs in FY12.

	PosRecl	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
The position description is being updated/submitted for PCN 10-1065 for potential reclass from Administrative Officer II (R19) to Administrative Operations Manager I (R22). This position manages the administrative functions for one of DNR's largest and most complex divisions -Mining, Land and Water and includes personnel, payroll, budget, RSA's, grants, accounting, travel, procurement, property control, etc. Approval will result in a three-range increase estimated to be approximately \$17,676. The cost for the position would continue to be distributed across multiple components served by the position. The reclassification is based on the level of responsibilities and duties currently performed by the incumbent and will bring parity between this position and Administrative Operations Manager I positions that have comparable duties and responsibilities for the other three major divisions within DNR.

<b>ADN 10-1-5021 Federal Funding for Recurring US Forest Service Grants in Operating FED from CIP Receipts</b>												
	LIT	0.0	100.0	0.0	-100.0	0.0	0.0	0.0	0.0	0	0	0
<p>Previously, recurring federal grants for State Fire Assistance, Forest Health, Forest Stewardship, and Urban and Community Forestry were authorized in the capital budget. CIP receipts in the operating budget reflected the actual expenditure of those funds in each budget cycle. Such grants are now reflected in the operating budget.</p> <p>The transfer of \$100,000 from services to personal services is necessary to account for the increased use of federal fund grants in personal services. The contractual line item has historically been underspent, resulting in the excess authority being available for transfer to personal services in order to "true up" the line item allocation to align with anticipated grant fund expenditures.</p>												
<b>ADN 10-1-5015 Transfer Forester III to Fire Suppression Preparedness PCN 10-9813</b>

<b>Reverse August FY2011 Fuel/Utility/Cost Increase Funding Distribution from the Office of the Governor</b>												
	OTI	-1.7	0.0	0.0	-1.7	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		-1.7										
Pursuant to Ch41 SLA10 Sec22 P82 L25 through P85 L3, \$13.5 million is distributed in August to State agencies from the Office of the Governor to offset the increased costs for fuel and utilities. Per the Department of Revenue (DOR), the fiscal year-to-date average price of Alaska North Slope crude as of August 1, 2010, was \$76.53 per barrel, which is \$1.12 (1.4%) below DOR's Spring 2010 FY2011 forecast amount of \$77.65.												
The amounts transferred to state agencies are as follows: Administration, \$20.5; Corrections, \$540.0; DEED, \$51.5; DEC, \$34.1; Fish and Game, \$69.9; HSS, \$540.0; Labor, \$31.8; DMVA, \$294.6; DNR, \$61.2; DPS, \$246.5; Transportation, \$10,125.0; University, \$1,485.0.

**Correct Unrealizable Fund Sources for Personal Services Increases**

	FndChg	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1002 Fed Rcpts	-30.1											
1004 Gen Fund	38.9											
1007 I/A Rcpts	-8.8											

This request shifts unrealizable 1) Federal , and 2) Interagency Receipt fund sources to General Funds for the Forest Management and Development Component to fund bargaining unit cost increases.

Federal Fund Shift - In FY12, the Division of Forestry will be spending from grant awards defined prior to the state's negotiation of salary cost increases. Grant awards specified deliverables for Forest Health, Forest Stewardship, and Urban & Community Forestry Assistance Programs based on negotiated salary rates that were in place under the 2007 - 2010 bargaining unit agreements. The FY12 collective bargaining rates are not covered under the grant presently acquired. Activities impacted include national resource education to schools, universities, and youth groups; forest pest monitoring and advice to land owners; and forest planning with Native corporations, local governments, and private landowners.

Inter/Agency Fund Shift – DNR will not receive increased inter-agency receipt funding from DEC for FY12 salary cost increases to perform inspections, monitoring, and forest plan reviews of industry and landowners for compliance with the Forest Practices Act and the Clean Water Act.

										PFT	PPT	NP
1004 Gen Fund		400.0										

This request supports private sector employment by providing a stable regulatory structure for the timber industry; ensuring continued access via existing forest roads; and through contracting for management of forest stand treatments and forest road maintenance. The increment has three emphasis areas, all contributing to these goals as follows:

1. State Forest Road Maintenance. The Division of Forestry (DOF) manages approximately 400 miles of all season forest roads. This valuable road network supports forest management and was constructed incrementally over time, in most part through the sale of state timber, with road construction being an obligation of the timber purchaser. This increment supports a regular maintenance program to ensure these road assets meet statutory and regulatory standards and continue to be open to provide access to forest resources. Forest roads are required by Alaska statute and regulation to meet certain best management practices (BMPs) and there has been a noted decline in BMP compliance in recent years particularly in the Northern Region where increased public use adds to maintenance requirements. While the primary purpose of these roads are in support of forest management, many of these forest roads are also used by the public for firewood gathering, hunting, fishing, camping, hiking and other recreational pursuits. Some roads may require closure to public access if not adequately maintained to required standards.

2. Ongoing reforestation and pre-commercial thinning. Alaska law requires minimum reforestation requirements on state lands following harvest. This is in keeping with the mandate of the Alaska constitution to manage renewable resources in perpetuity. Reforestation backlog has been largely addressed in the past through occasional capital funding. This increment will support a regular program to plant trees and scarify to prepare seedbeds for natural regeneration following harvest to minimize further reforestation backlog. Reforestation is most successful and less costly when completed promptly following timber harvest, before grass and brush vegetation becomes established. As with road maintenance, the bulk of reforestation requirements are embodied in timber sale contractual requirements, however personal use harvest and some commercially harvested or burned areas require supplemental scarification and/or planting.

In Southeast Alaska pre-commercial thinning can significantly enhance forest productivity. Close to 4,000 acres of State land have been harvested in Southern Southeast since 1997, and additional state forest lands were previously harvested under federal management prior to conveyance to the State. About 8,000 acres, or 25% of the state forest lands available for harvest in Southern Southeast, are in reproduction stage. Pre-commercial thinning can reduce the time it takes to produce merchantable saw timber by 20 years or more. This treatment also can improve habitat for Sitka blacktail deer by encouraging browse species on the forest floor. Once forest stands get older than 30 years pre-commercial thinning is no longer feasible. Pre-commercial thinning cannot be indefinitely deferred or this opportunity to enhance forest productivity will be lost.

3. Forest Resources and Practices Act (FRPA) implementation. The Alaska Forest Resources and Practices Act (FRPA) is designed to protect fish habitat and water quality while supporting economically feasible timber operations. The Board of Forestry emphasizes that effective implementation of the Act is an essential part of the State's efforts to ensure the survival of the timber industry in SE Alaska, and support growth of the timber sector in other parts of the state. Implementation maintains public confidence that public resources are adequately protected. This increment supporting FRPA work includes timely reviews of mandatory plans of operation for timber activities, field inspections, training for timber operators, enforcement actions, and compliance monitoring.

For the first three quarters of 2010, FRPA workload for private land harvest plan review is more than twice that of the entire 2009. This increase in activity is welcome news to the timber industry; however it presents challenges for DOF as funding for FRPA work is declining. FRPA has always been a state program, funded fully by state general funds until 1999, when some federal Clean Water Act section 319 funds became available to help pay a portion of the program. In years of declining GF budgets the federal funds kept the program operational. Interagency receipts from the Department of Environmental Conservation (DEC) of \$115.0 for FRPA implementation will be eliminated in FY12 due to federal Clean Water Act 319 funding reductions. This funding supports DOF field presence including travel costs and personnel services. \$85.0 from the Clean Water 319 funds have also supported state Fish and Game (ADFG) Habitat biologists in FRPA implementation, an important partner in FRPA program delivery, and these funds are also eliminated in FY12. General funds are required to maintain this state program and to maintain a strong field presence, which is critical to maintain best management practices on state and private forest lands in Alaska.

**Component:** Forest Management and Development (435)  
**RDU:** Resource Development (136)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP
<p>What is the impact of not approving this increment?                      The inability to maintain forest roads may force some road closures in the Tanana Valley State Forest and Haines State Forest to avoid detrimental water quality impacts and violation of state Forest Practices statutes and regulations. Roads that are not currently active for commercial timber sales will be considered for closure, limiting access for Alaskans for personal use fuel wood and other recreational pursuits. The State's credibility as a regulator of forestry Best Management Practices will be compromised.</p> <p>The reforestation backlog that in the past has been reduced through CIP funding will continue to grow, and reforestation costs on a per acre basis will be higher as competing vegetation takes hold with a less regular and timely funding mechanism. The DOF credibility as a regulator of forestry Best Management Practices on private lands will be compromised by its inability to meet reforestation standards on state lands.</p> <p>Fewer acres in the Southeast and Haines State Forests will be thinned, reducing benefits of increased annual allowable cut associated with shortened rotation period. The window of opportunity to complete pre-commercial thinning on backlog acres logged under Federal management will narrow, limiting forest productivity through the end of the next rotation. It will take longer for second generation timber stands to mature to a size acceptable to a retooled timber industry that can process smaller second growth timber</p> <p>There will be a significant impact on program delivery as FRPA workload is increasing in a time of declining federal receipts. The public and commercial and sport fishing group's confidence that timber harvest can coexist with other forest-dependant resources will be compromised. The FRPA may no longer be viewed by stakeholders or Federal regulators as effective in meeting its stated intent to protect public water and habitat resources.</p> <p>Program, services, and recipients affected by this funding:</p> <ul style="list-style-type: none"> <li>• Public and commercial users of state forest lands in Tanana Valley, Matsu, Haines, Copper River, Kenai Peninsula and Southeast</li> <li>• Contractors providing road maintenance, tree planting and pre-commercial thinning services.</li> <li>• Private landowners (primarily ANCSA Corporations)</li> <li>• Road construction and logging companies accustomed to a preventative FRPA program with field presence vs. a more punitive program</li> <li>• Businesses depending on timber supply from State and private lands</li> <li>• ADFG Habitat Division and DEC as partners in FRPA implementation</li> <li>• Commercial, sport and subsistence fisheries that depend on appropriate habitat protections.</li> </ul>

--	--------	-----	-----	-----	-----	-----	-----	-----	-----	---	---	---

Full time position funded by CIAP, via RSA from Division of Coastal and Ocean Management

Under guidance by the Geologist IV overseeing the division's coastal hazards program, provide field and office assistance as well as technical, database, and GIS support for preparing maps, reports, and metadata for publication.

Duties include:

- Assist with logistics and geologic field work. Specific tasks may include helping to set up camp facilities and field operations, organizing and distributing equipment (radios, satellite phones etc.), helping with daily camp operations, participating in geologic-based field work and interpreting geologic data acquired by other geologists.
- Assist in processing and analyzing field samples, including sediment grain size, pebble counts and prepping radiocarbon samples.
- Assist supervisor with selecting, preparing, and shipping/delivering samples for various geological analyses.
- Use ArcGIS programs to create/edit the various pieces needed to make GIS-based geologic maps. Specific tasks may include: importing various data files, georegistration of scanned geologic map sheets, on-screen digitizing and editing of geologic units, and creating, labeling, and attributing point, line, and polygon layers. Once GIS files are completed, layers will be exported to a graphics program (e.g., CorelDraw or Adobe Illustrator), where creation of the final geologic map layout will take place. Final map publication tasks include digital file archiving and metadata documentation of files.
- Utilize graphics programs (e.g., CorelDRAW, Adobe Illustrator, Microsoft PowerPoint) to make figures for geologic report(s) to accompany geologic maps and presentations.
- Use Microsoft Excel spreadsheet and Access database software for data entry, and to organize, quality check, and enhance existing datasets in preparation for use in geologic analysis and GIS file creation.
- Use large- and small-format scanners and Adobe Acrobat to create digital (\*.pdf, \*.jpg, and/or \*.tif) files of paper or mylar geologic map sheets, miscellaneous geologic data, and field note cards.
- Assist team members with miscellaneous project-related geologic and other tasks as needed.

This nonpermanent Geologist I position is needed to assist in the execution of a large statewide project to map and assess geologic hazards affecting coastal communities in Alaska.

If this request is denied, we will have insufficient personnel to complete the maps and reports needed to meet the deliverables schedule for the funding source (Coastal Impact Assistance Program). We would be forced to seek the services of a contract geologist, which would result in a tripling or quadrupling of the hourly cost and thus severely curtail our ability to conduct field work in imperiled communities and therefore reduce the number of communities that could be assessed for geologic hazards. Thus, even using a contract geologist, the costs would be such that we would still not be able to meet the deliverables schedule of the funding source.

Much of this work is currently being done by two Geologists IV, one of whom is assigned to a different project but is assisting as much as possible until the new position is hired. This program is currently in the beginning stages, and the work load will be escalating to levels that cannot be met by the positions currently covering the duties.

This Geologist III long-term non-perm will be working with the Division's Airborne Geophysical Survey program. The position is needed in order to process a large backlog of state-funded airborne geophysical survey data so that it can be released to the public. This position will be funded by CIP receipts.

This position was initially filled as a Natural Resource Technician II at the Alaska Geologic Materials Center (GMC) in May, 2009. To address public demand for improved delivery of inventory and geologic information about the archived samples at the GMC and to prepare for moving the entire collection to a new facility in a few years, the duties of this position have become more geological in nature, requiring expertise at the journey professional, Geologist II level. The incumbent has been performing the duties of a Geologist II as required to meet and exceed the current year objectives set for the GMC and a reclass is necessary. These upgraded duties include (1) working as part of a project team to coordinate geologic database development; (2) conducting trial runs of geologic programs and software to be sure they will produce desired results and that user instructions are accurate; (3) developing queries for improved access to and analyses of geologic materials inventory information; (4) providing overviews to visiting geologists, oil industry representatives, students, educators, etc. regarding the geologic materials inventory; (5) assembling, arranging, and preparing geologic materials for exhibition and/or storage; and (6) compiling appropriate information and data from geologic reports required for geological sample documentation.

The Plant Materials Center (PMC) provides Alaska potato growers with pathogen-tested and certified seed as per 11 AAC 34.075(J). The seed potato project was initiated in 1984 to help stop the significant disease losses occurring to Alaska's potato crops. All seed potato certification programs in the U.S. and Canada require the initial seed stock be derived from pathogen-tested tissue culture produced seed. Alaskan-produced certified seed potatoes meet or exceed these requirements due to the efforts of the PMC potato project. The potato program helps to prevent the introduction of diseases to Alaska by providing certified and tested seed stock.

**ADN/RPL 10-0-5054 Develop Rural Village Seed Program**

The North Latitude Plant Materials Center component has an approved ARRA project ADN/RPL 10-0-5054, Develop a Rural Village Seed Production Program and an RSA 100025 from the Governor's Office for funding authorization. This program is active through September 30, 2012.

PMC currently has two long term non perm positions working on this project. (PCN 10N10002 - Natural Resource Specialist II - R16 and PCN 10N10003 - Agronomist I-R16). Both positions were included in the RPL.

Current FY 12 personal services CIP authority in this component is \$43.5. To cover the positions listed below an additional \$136.0 CIP personal services authority is needed for a total of \$181.3.

**Change PCN 10-3082 from Full-time to Part-time Status**

<b>Realign Line Items to Maintain Vacancy Factor</b>												
	LIT	0.0	6.7	0.0	0.0	-6.7	0.0	0.0	0.0	0	0	0

This line item transfer from commodities to personal services reflects anticipated increases in personal services expenditures due to step increases and allows for a reasonable vacancy rate.

Economic factors such as weather, the price of feed, fertilizer, the national average paid for animals are all factors causing a natural up and down cycle of expenditures and the availability of meat. Additionally, institutions purchasing meat cycles due to the changing client base. The current downward cycle allows the excess authority in commodities to be transferred from commodities to personal services.

If the transfer is not approved the Agricultural Revolving Loan Program component will be unable to meet its personal services obligations in FY12.

The Public Services Office component (PSO) is primarily funded with RSAs from divisions within DNR; most of these RSAs are paid for with general funds. As personal service costs in the PSO component continue to increase, they traditionally receive increased IA authorization in the budget with the expectation that they collect more via RSA from divisions. The PSO is unable to pass this additional cost on to the divisions in FY12, as the divisions are not receiving additional general funds to pay for the service.												
No additional RSA funding is forthcoming in FY12, requiring a fund change to general funds to allow the component to maintain the same level of service in our Public Information Offices in Anchorage and Fairbanks.

		4.3										
Pursuant to Ch41 SLA10 Sec22 P82 L25 through P85 L3, \$13.5 million is distributed in August to State agencies from the Office of the Governor to offset the increased costs for fuel and utilities. Per the Department of Revenue (DOR), the fiscal year-to-date average price of Alaska North Slope crude as of August 1, 2010, was \$76.53 per barrel, which is \$1.12 (1.4%) below DOR's Spring 2010 FY2011 forecast amount of \$77.65.												
The amounts transferred to state agencies are as follows: Administration, \$20.5; Corrections, \$540.0; DEED, \$51.5; DEC, \$34.1; Fish and Game, \$69.9; HSS, \$540.0; Labor, \$31.8; DMVA, \$294.6; DNR, \$61.2; DPS, \$246.5; Transportation, \$10,125.0; University, \$1,485.0.

The FY12 Operating Budget will continue funding the annual operation costs for the Trust Land Office (TLO). The TLO was established by statute to manage the lands and other non-cash assets of the Alaska Mental Health Trust Authority. Our mission is two-fold: (1) to protect and enhance the value of Alaska Mental Health Trust lands; and (2) to maximize revenues from Trust lands over time. Operation costs include personal services and travel expenses for staff, contractual expenses such as professional services, contracts for janitorial and snow removal, ongoing costs for utilities, postage, advertising, etc., and supplies such as office equipment and general office supplies. The TLO is advised by the Trust Authority Resource Management Committee.												
The operating budget provides the core funding for the Trust Land Office.

<p>The trustees approved a Five-Year Work Plan that requires a full-time Trust Resource Manager to provide project and technical support on a statewide basis with emphasis on the Anchorage area and surrounding central region.</p> <p>Multiple projects are planned for land, real estate and the Underground Coal Gasification Program which will require onsite support. For the past several years, this position has been based in Petersburg while the Trust Land Office focused on re-building community relationships in south east Alaska and completing projects which included trespass, environmental, and on-site assistance with Trust timber projects and land sales. If the position transfer does not go through, it will jeopardize the Anchorage projects as we will not have adequate staff to support the workload. There is also a change record to change this PCN to a full-time permanent.</p>

**Recordable Disclaimer of Interest Fees**

	Inc	100.0	0.0	0.0	100.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		100.0										

The Division of Mining, Land and Water (DMLW) requests \$100.0 to pay cost recovery fees to the Bureau of Land Management (BLM) associated with the filing of 20 Recordable Disclaimer of Interest (RDI) applications. These RDIs provide certainty of state ownership of lands under navigable waters, thus eliminates many access conflicts and restrictions claimed by others. Alaskans need to be able to use the lands that were granted at statehood.

Each RDI application DMLW files costs about \$5,000 to cover BLM cost of adjudicating the applications. DMLW expects to submit 20 applications in FY2012 because of the data available from the navigability reports that will be complete by the end of FY2011. The funding in this component is not sufficient to cover this quantity of RDI submissions.

Filing this quantity of RDIs is the culmination and result of a multi-year research effort primarily funded by the BLM. The BLM funded DMLW to conduct research and write navigability reports. Although the purpose of these reports was to provide information of what water bodies are deemed navigable by BLM, necessary for their land management decisions, the state benefits from having access to this historical research necessary to file RDIs. Using these reports as the navigability evidence to support the RDI applications significantly reduces the costs charged by BLM for processing RDIs because BLM staff does not have to provide additional scrutiny of something they have already approved.

DMLW has made commitments to the Legislature that we would file an increased number of RDI applications when the BLM navigability reports are completed. Multiple reports are now being completed, thus DMLW is poised to submit a series of applications, about two per month, if the filing fee funds are available. Having a good quantity of RDI applications should also help BLM justify keeping the RDI program staffed and operational, which benefits the state in reducing costs of clearing the cloud on the title of lands under navigable waters.

**Department of Natural Resources**

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP

The state received ownership of all the lands under navigable waters at statehood under the Equal Footing Doctrine and the Submerged Lands Act. The boundaries to that ownership are not identified in any conveyance document, but many federal conveyances erroneously purport to convey these lands to entities other than the state. The federal government had the responsibility to hold these lands under navigable waters in trust for the future state of Alaska up until statehood. Therefore there has been continuous confusion over the ownership of these lands and there have been many conflicting navigability determinations. In order to clear up the confusion, the state has to prove that the navigable water is navigable in fact, or susceptible to trade, travel or commerce. This is possible to do through a quiet title action, but prohibitively expensive due to the number of navigable water bodies in the state. Each quiet title action will likely cost more than \$1 million. DMLW has worked out an administrative process with BLM to quiet title of the lands under navigable inland waters. This process allows BLM to administratively review the supporting facts and disclaim any federal interest in ownership.

It is highly unlikely, due to the significant cost of a quiet title that another entity would choose to file a quiet title action against the state once the federal government disclaims its interest.

This increment provides funding based on an FY2011 supplemental request.

**Access Assertion Litigation**

	Inc	599.0	115.0	30.0	418.0	36.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund		599.0										

This FY 2012 request is for access assertion litigation with a focus to quiet title to key RS 2477 routes on a regional basis in the Fortymile/East Alaska area. This access is vital to the mining industry and for use in hunting. The funds will be used to complete research on historical and physical attributes of a number of RS 2477 easements in the Fortymile/East Alaska area and to file 180-day notice to assert quiet title action litigation. There are approximately 39 RS2477s in this region.

RS 2477s are fact-based upon historical use of specific trails; a solid chain of evidence must be available. Historical research and field work for physical verification is necessary to determine if there is sufficient factual evidence to support litigation. Field verification of the actual route with GPS-Arc/GIS mapping is a critical component. The research will include the Washington Alaska Military Communication and Telegraph (WAMCAT) route and pre WAMCAT historical use. RS 2477s will be asserted with quiet title actions where strong factual evidence is discovered and budget constraints allow. Information gathered through this funding will position the State of Alaska so that quiet title actions can be filed when the Department of Law believes there is sufficient historical documentation and there are sufficient fiscal resources allocated to fully litigate these legal actions. Historically, quiet title actions have exceeded \$1 million per action. However, economies of scale can be achieved in this regional approach.

Other important routes to resources (both land and water) as well as support for existing access litigation will be supported by this increment. Additionally, the information will be used to develop court cases and create exhibits. The Fortymile area has a rich history of use with many sources of information.

Contractual costs will include an RSA with the Office of History and Archeology and legal support through the Department of Law and a private contractor as needed. Travel and commodities costs are included to support field verification needs. One four-wheeler, one Argo, and trailers for each will be needed for various overland travel. Existing equipment within other components of Mining, Land and Water will not be available for use by the RS 2477 unit during summer field season. Much ground will need to be covered with many wetlands, and an Argo is needed for ground-truthing surveying. The Division's Northern Region could also utilize the Argo for the Rex Trail and other areas.

Not funding this increment will result in continued access problems in this region. Miners can be deprived of access to valid state mining claims. Areas of state land can become inaccessible as RS 2477s are blocked or restricted. Hunters and guide industry can be restricted by limiting access by the federal government

Pursuant to Ch41 SLA10 Sec22 P82 L25 through P85 L3, \$13.5 million is distributed in August to State agencies from the Office of the Governor to offset the increased costs for fuel and utilities. Per the Department of Revenue (DOR), the fiscal year-to-date average price of Alaska North Slope crude as of August 1, 2010, was \$76.53 per barrel, which is \$1.12 (1.4%) below DOR's Spring 2010 FY2011 forecast amount of \$77.65.

The amounts transferred to state agencies are as follows:

Administration, \$20.5; Corrections, \$540.0; DEED, \$51.5; DEC, \$34.1; Fish and Game, \$69.9; HSS, \$540.0; Labor, \$31.8; DMVA, \$294.6; DNR, \$61.2; DPS, \$246.5; Transportation, \$10,125.0; University, \$1,485.0.

This request shifts unrealizable Federal fund sources to General Funds for the Fire Suppression Preparedness Component to fund bargaining unit cost increases.												
In FY12, the Division of Forestry will be spending from grant awards defined prior to the state's negotiation of salary cost increases. Grant awards specified deliverables for the State and Volunteer Fire Assistance programs based on negotiated salary rates that were in place under the 2007 - 2010 bargaining unit agreements. The FY12 collective bargaining rates are not covered under the grant presently acquired. Activities impacted include initial attack and containment of wildland fires; training of firefighters, fire department personnel, and dispatch and logistics support; and prevention, safety, and public education.												
If not funded, end results affected include safe wildland fire management and containment of initial attack fires, and adequate resources for response to wildland fire incidents.

Wildland Fire Academy

**Department of Natural Resources**

**Component:** Fire Suppression Preparedness (2705)  
**RDU:** Statewide Fire Suppression Program (140)

Scenario/Change Record Title	Trans Type	Totals	Personal Services	Travel	Services	Commodities	Capital Outlay	Grants, Benefits	Miscellaneous	Positions		
										PFT	PPT	NP
1004 Gen Fund	Inc	390.0	140.0	70.0	110.0	70.0	0.0	0.0	0.0	0	0	0

The demands of wildland fire fighting in Alaska have changed. Factors such as urbanization, the continued addition of recreation and remote improvements, weather anomalies, liability issues, training requirements are all contributing factors. To meet these demands as well as maintain wildland fire service levels to the public and increase training and job opportunities for Alaskan residents, the Division of Forestry needs to change the approach to fire fighting training with a Wildland Fire Fighting Academy. This approach will give Alaskans an opportunity to establish a foundation for future careers in wildland fire management.

Wildland Fire Fighting Academies will provide courses in dispatching, helicopter crew member, engine boss, additional introductory and advanced training required for initial and extended attack fire fighting, and fire business management. Courses will meet standards for National Wildfire Coordinating Group (NWCG) designed to provide a curriculum that reflects the complexity and demands of Alaska's fire fighting as well as meeting national interagency standards. Courses would be in cooperation with the University of Alaska and students would receive college credit establishing a foundation and encouragement towards an advanced degree. The Academies would train 80-120 students, depending on the mix of courses offered.

It is important to note that the term 'Academy' is not used as a location, but a concept for centralized coursework, administration, and opportunity. The primary focus has been in Tok and McGrath where rural students have best been reached. However, it is the intent of the Academy(s) to be able to move as needed to an area where the environment is most conducive or conditions are such that holding centralized training at that location would serve the greatest need.

Wildland Fire Fighting Academies will provide in-state capacity for single-resource personnel and crews while contributing to maintaining an experienced and qualified work force. It will serve to reduce the Division of Forestry's reliance on Lower 48 agency personnel and crews while providing jobs to Alaskans. Cooperative support, financially and in-kind, has been demonstrated from the Bureau of Indian Affairs, U.S. Fish and Wildlife Service, Doyon Foundation, Tanana Chiefs, Association of Village Council Presidents, and Alaska Fire Service. A majority of this support will be directed towards recruiting, transporting, and outfitting students from rural Alaska.

This increment would have a statewide impact. Academies would be offered in communities such as Tok, McGrath, Fairbanks, and Palmer.

Personal services costs would be used to increase staff months for existing employees. Two Regional Training and Prevention Officers (PCN 10-9810 and 10-9811) are the known, constant PCNs that will be used during each academy year. The use of other PCNs will be dictated by the focus and location of the training which will be determined based on need. This increment also includes travel for student and instructor transportation, training space, and course materials and equipment.

Positive impacts of fire fighting training on individuals, communities, and Alaska

- Individuals: The academy equips Alaskans with the qualifications to take job assignments as single resources or to advance as more experienced crewmembers.
- Villages/Communities: Increased qualifications lead to increased job opportunities which provide positive impact to village/community economies. Each student takes the newly-gained experience and can help mentor rookies and other individuals who are interested in becoming a fire fighter. Fuels reduction strategies can be discussed and that knowledge brought back to the community. One new crew boss can result in 15 other job opportunities for the village.
- Alaska Firefighting Community: Academies will provide the future supervisors on crews, such as a Squad Boss/Assistant Crew Boss/Crew Boss. Their skills sets allow them to be single resources and fill overhead and staffing needs for the agencies and on assignments.

										PFT	PPT	NP
<ul style="list-style-type: none"> <li>Sustainability: The success of these two academies and the partnerships developed has laid a strong foundation for future academies. With 9.5% average unemployment in rural Alaska, and some regions at 16%, two thirds of Forestry's current employees eligible for retirement within five years, the academies offer career development opportunities in forestry and management of Alaskan resources to a broader rural group.</li> </ul> <p>Goals and Objectives:</p> <ul style="list-style-type: none"> <li>Reduce the number of fire fighting resources needed from outside of Alaska.</li> <li>Increase emergency response preparedness.</li> <li>Increase rural Alaskan opportunities for career, educational, and economic advancement.</li> <li>Provide additional training for Alaskan's in order to fill vacancies/needs within the Alaska firefighting community.</li> <li>Improves the quality and frequency of use for Alaska Type 2 EFF crews.</li> <li>Increase advanced training opportunities.</li> <li>Increase statewide employment potential in economically depressed areas.</li> <li>Increase recruitment diversity for all fire management organizations.</li> <li>Increase the number of individuals with higher level firefighting qualifications available from rural Alaska.</li> <li>Provide better qualified crews for hazard fuels mitigation, fire suppression, and Community Wildland Fire Protection Plan (CWPP) projects</li> </ul> <p>If this request is not approved, the Division of Forestry will miss out on the opportunity to reduce costs of fire fighting training while enhancing job and education opportunities to Alaskans. There will be continued reliance on the Lower 48 overhead and crew resources and increased suppression costs due to mobilization and demobilization of those resources. This use of out-of-state resources extends service delivery time and cost due to transportation.</p>

<b>ADN 10-1-5025 Transfer from Personal Services to Other Line Items to Maintain Existing Level of Service</b>												
LIT		0.0	-25.3	13.5	0.0	11.8	0.0	0.0	0.0	0	0	0
<p>The State Historic Preservation Program (SHPP) has a very low vacancy factor in its FY11 budget. This change record requests transfer from personal services line item to travel and supplies. SHPP is responsible for statewide programs, services, and projects. Carrying out these responsibilities requires travel throughout the state. Staff work with communities, organizations, agencies and individuals responsible for the preservation, conservation and management of historic and archaeological properties. The increase in travel monies will help cover basic costs of required travel for training, technical services, and resource identification and evaluation. The line item transfer to supplies provides funds to cover the increased cost of supplies. The SHPP component is responsible for a wide variety of programs. Supplies are needed for training, field work, office, archaeology laboratory, and educational outreach. Costs in this area are increasing and the line item transfer enables the program to maintain its current level of support.</p>

Pursuant to Ch41 SLA10 Sec22 P82 L25 through P85 L3, \$13.5 million is distributed in August to State agencies from the Office of the Governor to offset the increased costs for fuel and utilities. Per the Department of Revenue (DOR), the fiscal year-to-date average price of Alaska North Slope crude as of August 1, 2010, was \$76.53 per barrel, which is \$1.12 (1.4%) below DOR's Spring 2010 FY2011 forecast amount of \$77.65.												
The amounts transferred to state agencies are as follows: Administration, \$20.5; Corrections, \$540.0; DEED, \$51.5; DEC, \$34.1; Fish and Game, \$69.9; HSS, \$540.0; Labor, \$31.8; DMVA, \$294.6; DNR, \$61.2; DPS, \$246.5; Transportation, \$10,125.0; University, \$1,485.0.

<b>Increase CIP Receipts to Cover Additional Personal Services Charges</b>												
	Inc	35.9	35.9	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1061 CIP Rcpts		35.9										
<p>PCN 10-5273 was originally budgeted for as an Engineer Assistant II. The position is now an Engineering Architect II and an increase of \$35,900 in CIP receipt authorization is required to reflect the accurate cost of the position in the operating budget.</p>												
<b>Realign Line Items to Accommodate Changes in the Boating Safety Program</b>												
	LIT	0.0	24.0	0.0	-24.0	0.0	0.0	0.0	0.0	0	0	0
<p>In FY2011 the Boating Safety program was moved from the CIP budget to the Operating budget. The Federal funding line item authority was established based on the previous year's CIP grant request.</p> <p>The grant request did not take into account the raises established by the Union contracts. Therefore, we did not add enough personal services authority in FY2011 or the base of FY12 to accommodate the costs of personal services for the Boating Safety staff (PCN's 10-5062, 10-5101, 10-5257, and 10-5260).</p> <p>The authority is available in the services line because the large-scale media promotion for the boating safety program is ending in FY11.</p>
