Brief Summary and Statement of Need:

Pelican High School Mechanical Upgrades is #5 on the December 17, 2010 CIP Major Maintenance list. This 13,670 square foot school was built in 1976. The old heating and ventilation systems are in poor condition and do not provide adequate heat or fresh air to the school. This major renovation to the mechanical room will replace the boiler with two smaller units, allowing for greater efficiency and redundancy. As necessary, the floor and plumbing will be replaced; the air handler refurbished; and the heating coil replaced. In addition, the existing waste line will be demolished and replaced with arctic pipe.
