Project Description/Justification:

The project will use chemicals to stabilize the runway surface for 3-5 years, to provide an interim solution so that a long term airport improvement project, now in the design phase, can be developed for the community. A long term project is scheduled after right-of-way issues are resolved, but is not anticipated to commence prior to 2013. Due to the need to acquire Native Allotments the exact timeframe for the long-term project is difficult to predict.
