After reconciliation of the current personal services needs within this component, authorization is being transferred to meet the anticipated expenditures in the contractual services line. Available authorization is due to turnovers and delayed recruitments of various positions within this unit and has been historically transferred during the operating year to meet the increased expenditures associated with contract support, licensing renewals, operating hardware support and renewals and other information technology services. This transfer is necessary to meet the on-going contractual obligations within this component for FY2012.

The department has experienced increased information technology costs associated with contract support, licensing renewals, operating hardware support and renewals, and other information technology equipment and services. Until now, these costs have been met using available personal services authorization within the Results Delivery Unit (RDU) due to position turnover and vacancies. However, position adjustments and successful recruitment efforts have made this authorization no longer available to offset these rising costs.												
The department provides centralized information technology (IT) services for all necessary support to maintain standardization within all IT areas in the department. With increased technology and electronics, these costs can no longer be met and funding from other components within the department is unavailable due to existing operational and program needs.

<p>The Electronic Monitoring (EM) Unit was established as a single component in FY2009 and partial funding was transferred from the Classification &amp; Furlough component at that time pending the full implementation and expansion of the program. Oversight of the EM Unit was also transferred from the Division of Institutions to the Division of Probation and Parole. Offenders in this program are supervised in the community and must continually meet certain conditions and criteria imposed by the program.</p> <p>The EM Unit is continuing to expand and is operational in Anchorage, Palmer, Fairbanks, Juneau, Kenai and Ketchikan. The average number of daily offenders participating in these programs for FY2011 was 287. The average daily count of offenders participating for the first two months of FY2012 is 334 and is anticipated increase through the remainder of the fiscal year.</p> <p>Transfer of this original authorization will meet the increased population placed on EM and support the operating expenditures of the program.</p>

<p>The FY2013 out-of-state facility bed rate will increase from \$60.64 per prisoner per day to \$61.84 per prisoner per-day. This is a contractually negotiated rate increase and is not associated with an increase to the prisoner population housed at the out-of-state facility.</p> <p>As of November 1, 2011, the out-of-state prisoner population was 1,050 with the in-state population continuing to exceed 100% of the institutional maximum capacity. The department has no expectation of any decline in the out-of-state offender population until the anticipated transitioning to Goose Creek Correctional Center beginning in May 2013.</p>

The Institution Director's Office is restructuring the administrative management of divisional resources in an effort to provide overall improved effective management. To assist in meeting this goal, PCN 20-5216 is being reclassified from an Administrative Officer II, Range 19 to an Administrative Operations Manager I, Range 22. This position will provide statewide oversight of the administrative operations in the 12 in-state institutions and operate with a substantial amount of independence in the planning, organization, direction, coordination and control of administrative support activities within State and Departmental guidelines.												
This Administrative Operations Manager I will be tasked with finding efficiencies and cost-effectiveness within the management of division funds and is tasked with eliminating costly errors in the procurements of goods and services. With increased scrutiny over the projected costs associated with housing offenders, it will be of benefit to have effective administrative leadership within the Population Management RDU to guide the Institutional Administrative Officers.												
This position will play a key role in the management of administrative support activities such as budget development, implementation and tracking, financial management and assuring compliance with all relevant State of Alaska accounting and procurement rules and regulations. The position will also play a key role in assisting to manage the financial resources for the statewide correctional facilities throughout Alaska from the RDU level. With the increasing scrutiny of projected operational costs for the department, it is essential for the Population Management RDU to manage within its existing budgeted resources. This can only be accomplished through strong administrative leadership from the Institutional Director's Office.												
Note: Location change from Anchorage to Juneau approved 12/29/2010, ADN 20-1-0056.

Transfer uncollectable Inter-Agency authorization from the Institution Director's Office component to the Lemon Creek Correctional Center (LCCC) component. The Inter-Agency receipt authority will support the budgeted Reimbursable Services Agreement (RSA) between the Alaska Marine Highway System (AMHS) and LCCC.												
Laundry services provided in prior fiscal years were performed under the Prisoner Employment Program (PEP); due to insolvency, this program was discontinued in FY2010. Two of the three industries under PEP have been eliminated; Laundry Services through LCCC continues operations to support the AMHS.												
The inter-agency receipt authority is available because there are no RSAs to support this authorization within this component.

After reconciliation of the current personal services needs within this component, authorization is being transferred from the contractual services line to meet the anticipated expenditures for FY2012. This transfer is necessary to meet the operating personal services costs. The increased need is associated with annual merit increases, position reclassifications, geographical differentials, and to maintain a zero vacancy factor within this component.

This request is for year-two funding associated with passed legislation for Sexual Assault, Child Porn, and Distribution of Indecent Materials; CH8, SLA10 (SB222). The legislation impacts the number of prisoners placed under the custody of the Department of Corrections (DOC). This request is based on the average number of new convictions or remands per year and the average estimated sentences associated with each change in the legislation. DOC continues to track the impact and will continue to request additional funds associated with the increased offender population housed under this legislation.  This bill has the effect of increasing the number of prisoners the DOC will have to house beginning in FY2012. These approximate costs are based on the average number of new convictions or remands per year and the average estimated sentences associated with each change in the draft legislation. DOC will track the impact and could potentially request additional funding based on actual impacts.

<p>This transfer of premium pay authorization will assist in meeting the additional staffing needs at YKCC. An additional post was established due to the increased work load demands associated with the increased population being housed at that facility. The YKCC current staffing is based on a maximum capacity of 137 offenders, but the current population averages more than 160 offenders daily. The daily average offender count at YKCC during FY2011 was 157 with increasing counts through the first quarter of FY2012 averaging 164 daily. This change will reallocate existing travel and commodity authorization within the 12 operating correctional centers. This redistribution of existing resources will more accurately reflect the operating costs of each institution and the actual housing of the offender population.

The offender population continues to grow statewide increasing the operating expenditures of each institution. Based on a five year average of actual expenditures, these transfers will provide a more equitable distribution of the existing authorization.

A total of \$21.6 of travel authorization and \$380.0 of commodity authorization is being transferred between the following institutions:

Transfer PCN 20-8138 Correctional Superintendent I with funding from Pt. MacKenzie Correctional Farm to the Goose Creek Correctional Center to provide oversight of the warranty phase during FY2012. In addition, this position will participate in a key role in the ramp-up and opening of the facility with anticipated housing of offenders beginning in FY2013.												
With the Goose Creek Correctional Center nearing completion, it is the intention of the Department of Corrections to combine the security management and administration of the new prison and the Pt. MacKenzie Correctional Farm. They will share a Correctional Superintendent and administrative, maintenance, food services, and other various personnel reducing the overall administrative position costs to both facilities.

Reclassify PCN 20-?170 Office Assistant III, Range 11 to an Administrative Officer II, Range 19.												
Reclassifying this position will provide the higher level administrative support needed with the start-up and opening of the new Goose Creek Correctional Center as well as on-going operations. This position is to be essential support in assisting with the administrative functions associated with the planning, development and design, and start-up of this new facility and was originally budgeted at the lower level. However, after re-evaluating actual administrative needs, the determination has been made that a higher level position is necessary to provide fiscal oversight and associated administrative support with the start-up and on-going operations of the new facility.												
This is also a location change from Palmer to MacKenzie Point.

With the completion of GCCC, the Department of Corrections (DOC) is now faced with the challenges of opening this new facility. These challenges are anticipated to be significant and include: Phased recruitment and training of correctional officers, probation officers, medical staff, program staff, and support staff; securing and facilitating air transports transitioning inmates from Colorado to Alaska and ground transports for property transition; population management by classification will occur statewide in an effort to house offenders in the most suitable institution and geographic area.

The DOCs plans include beginning recruitment efforts with the planned transfer of existing employees and the appointment and training of new employees to meet the opening of the new facility. It is anticipated that recruitment and training efforts will continue through the third quarter, with efforts centered on full staffing and training needs being met by the end of the third quarter. This plan allows for sufficient staffing required to meet the anticipated phased opening.

The housing of offenders is planned to begin during the first quarter of FY2013. The department will begin housing of the Special Management Unit (SMU) and will continue to expand the offender population during the second quarter with the opening of the General Housing Module A. During the fourth quarter, the department anticipates initiating the transfer of inmates back to Alaska from the out of state contract facility located in Hudson, Colorado. During FY2013 it is planned to transition 635 offenders of the total out of state population back to Alaska with any remaining offenders being brought back during the first quarter of FY2014.

<p>This transfer of premium pay authorization will assist in meeting the additional staffing needs at YKCC. An additional post was established due to the increased work load demands associated with the increased population being housed at that facility. The YKCC current staffing is based on a maximum capacity of 137 offenders, but the current population averages more than 160 offenders daily. The daily average offender count at YKCC during FY2011 was 157 with increasing counts through the first quarter of FY2012 averaging 164 daily. The daily population is anticipated to exceed 200 during FY2012.</p> <p>\$500.0 of personal services premium pay authorization is being reallocated as follows:</p> <p>(\$230.0) – Hiland Mountain Correctional Center            (\$220.0) – Palmer Correctional Center            (\$ 50.0) – Pt. This change will reallocate existing travel and commodity authorization within the 12 operating correctional centers. This redistribution of existing resources will more accurately reflect the operating costs of each institution and the actual housing of the offender population.

The offender population continues to grow statewide increasing the operating expenditures of each institution. Based on a five year average of actual expenditures, these transfers will provide a more equitable distribution of the existing authorization.

A total of \$21.6 of travel authorization and \$380.0 of commodity authorization is being transferred between the following institutions:

This transfer of premium pay authorization will assist in meeting the additional staffing needs at YKCC. An additional post was established due to the increased work load demands associated with the increased population being housed at that facility. The YKCC current staffing is based on a maximum capacity of 137 offenders, but the current population averages more than 160 offenders daily. The daily average offender count at YKCC during FY2011 was 157 with increasing counts through the first quarter of FY2012 averaging 164 daily. The daily population is anticipated to exceed 200 during FY2012.

\$500.0 of personal services premium pay authorization is being reallocated as follows:

- (\$230.0) – Hiland Mountain Correctional Center
- (\$220.0) – Palmer Correctional Center
- (\$ 50.0) – Pt. MacKenzie Correctional Farm
- \$500.0 – Yukon-Kuskokwim Correctional Center

This change will reallocate existing travel and commodity authorization within the 12 operating correctional centers. This redistribution of existing resources will more accurately reflect the operating costs of each institution and the actual housing of the offender population.

The offender population continues to grow statewide increasing the operating expenditures of each institution. Based on a five year average of actual expenditures, these transfers will provide a more equitable distribution of the existing authorization.

A total of \$21.6 of travel authorization and \$380.0 of commodity authorization is being transferred between the following institutions:

This transfer provided the Bethel Regional Probation Office with the expanded support needed for the sex offender population in Bethel. Before this transfer, there was one Adult Probation Officer I/II supervising the Bethel sex offender caseloads, which exceeded 80 offenders. It is important to maintain lower caseloads per probation officer for the effective supervision of sex offenders currently under the treatment within the Bethel community as well as those that are not yet in treatment. This position is more supportive to the Sex Offender Management Program located within the Bethel community.  OMB approved 5/16/2011.

This project maintains inter-agency funding to continue the operations of the Fairbanks Probationer Accountability with Certain Enforcement (PACE) pilot project. It places the most serious of domestic violence (DV) misdemeanor offenders on formal supervised probation. Under the model being investigated, DV offenders are to be immediately arrested, brought to court and sanctioned for a violation of conditions prohibiting the use of alcohol and drugs and for failing to comply with treatment requirements. The PACE pilot project was implemented in Anchorage and continues to achieve positive results with felony probationers.  Funds support a Probation Officer and a Criminal Justice Technician to run the pilot program; the PCNs for these positions exist, unfunded.

<p>These offenders are often released from Alaska's prisons with rehabilitative programming or supervision restrictions that require them to remain in Anchorage, Fairbanks or Bethel until programming is completed, instead of returning to their home communities. They are faced with attempting to find employment, housing, etc. in an unsupported environment, and placed on a lengthy waiting list for rehabilitative programming.</p> <p>Additionally, overall caseloads in these hub communities approximate 90-110 per probation officer, preventing these offenders from receiving the targeted supervision and structure that could assist them in successful rehabilitation and subsequent reintegration into their home communities. With very little probation officer oversight or targeted supervision, approximately 72% of parolees violate their probation and/or parole conditions within 6 months for technical violations such as failing to report, failure to complete rehabilitative programming or continued substance abuse.</p>

Institutions to the Division of Probation and Parole. Offenders in this program are supervised in the community and must continually meet certain conditions and criteria imposed by the program.

The EM Unit is continuing to expand and is operational in Anchorage, Palmer, Fairbanks, Juneau, Kenai and Ketchikan. The average number of daily offenders participating in these programs for FY2011 was 287. This request is to increase staffing within the Electronic Monitoring (EM) Program in Anchorage, Palmer and Juneau by four permanent full time positions to assist with managing in-state offender population.

The EM Program provides a viable alternative to institutional "hard" or Community Residential Center (CRC) "soft" beds and allows an offender to be monitored in the community. This also gives the offender the opportunity to be employed, meet family and financial obligations, and is a source for reintegrating offenders back into society. These programs provide community supervision of offenders who must continually meet certain conditions imposed by the program.

The need for expanding EM has been demonstrated by the significant increases and positive results shown by offenders meeting the criteria for EM placement. With the additional staff, the number of participants for electronic monitoring will increase within these locations freeing up the "hard" and "soft" beds for more serious offenders.

Additional funding is needed to cover costs for operating the 15 community jails that house state prisoners. In FY2012, the Department of Corrections (DOC) received financial reports from the communities and determined the original estimates were not sufficient. DOC allocated available FY2012 funding based on reported financial data and each community was funded at approximately 95.7% of their costs to operate. A supplemental was requested to fund remaining costs for FY2012.

DOC is currently analyzing financial data from the community jails and evaluating a methodology to adequately cover operational costs of the 15 community jails participating in the program. DOC anticipates updating the community jails funding allocation for FY2014 once the cost analysis is complete.

This FY2013 amendment will fund community jails at the same level as FY2012 plus the supplemental amount.

Additional funding is requested to pay the department's Community Residential Center (CRC) contractual obligations 100% in FY2013. The Department of Corrections (DOC) has professional services contracts with six CRC providers to help meet the security and residential needs of adult offenders in the State of Alaska. These negotiated contracts allow for an annual Consumer Price Index (CPI) rate increase for each contract. With this additional funding, the department will be able to pay CRC contracts in full with the CPI increase.

The DOC uses CRC beds as a cost-effective means of providing correctional services under supervision to offenders who are preparing to re-enter back into the community freeing up more expensive hard beds in the correctional facilities for serious, violent offenders.

- Utilization of CRC beds is in line with the Department's goal of supervised re-entry. The benefits associated with using these types of beds are:
- The CRC provides a safe environment with a lesser level of supervision in preparation for the offender being released back into the community;
  - The CRC provides housing and a level of supervision while the offender obtains employment prior to being released into the community;
  - The CRC provides access to community resources such as treatment and job service which may not be available within the jails and prisons;
  - The CRC allows a stable environment from which to establish or re-establish family and community support.

In FY2012 the Mental Health Trust added funding for a Criminal Justice Technician I/II located in Anchorage to track and evaluate outcome measures and other data pertaining to beneficiaries. The Criminal Justice Technician will be able to track and provide reports on program outcome measures, clinical contacts, unit census changes, mental health Title 47s, access to programming, treatment failures, suicide data, assault and injury data, release data and a variety of other beneficiary and programming needs. This is critical to providing recidivism, relapse and re-entry data on current re-entry and criminal recidivism reduction efforts and is consistent with the department's efforts to improve data collections and reporting.

This vacant PCN was established through the Mental Health Trust recommendations in FY2009 in anticipation of expanding the Adult Therapeutic Courts in Juneau. The decision was later made to increase the Youth Courts and this position was placed on hold and has not been established or funded.

This project maintains a critical component of the Disability Justice Focus Area by providing foundational knowledge on mental health disorders and cognitive impairments, best-practice and available treatment, and our state's community behavioral health system to mental health clinical staff from the Department of Corrections (DOC). The DOC has 48 clinicians, psychiatric nurses, counselors, ANPs and psychiatrists system-wide. This staff is located in facilities from Bethel to Seward to Juneau and serve some of Alaska's most severely ill beneficiaries. This funding would enable the DOC to bring all clinical staff to one location for two days of training from in-state and out-of-state experts in the field to present on a variety of topics such as FASD, TBI, and developmental disabilities. This training will make it possible for the DOC clinical staff to provide service and support to inmates with a variety of mental health disorders and cognitive impairments.

The Department of Corrections (DOC) has operated the Institutional Discharge Project Plus (IDP+) since 2002. The caseload for this clinician currently exceeds 85 statewide, far exceeding the national best-practice standards. This project uses a mental health clinician to link felony offenders with a psychotic disorder being released on probation or parole into community treatment programs statewide. The pre-release discharge planning can include an expedited Social Security application for individuals who qualify. In addition, the IDP+ mental health clinician works closely with probation officers to closely monitor court ordered conditions to enhance the individual's motivation and prospect for continued treatment and stability, and to promote public safety.

In 2007 Hornby, Zeller, & Associates studied a sample (n=125) of felons 1-year post-release from the IDP+ program. For those who participated and completed the IDP+ program, there was a 15% recidivism rate one year post-release compared to the 38% average for all other offenders.

This funding will expand the IDP+ program with one additional IDP+ mental health clinician to redistribute the caseload to the national best-practice standard, to expand clinical eligibility for the programs services (including high needs & high risk individuals that have bipolar disorder, mental retardation, Traumatic Brain Injury, Fetal Alcohol Spectrum Disorder or other serious cognitive impairments), to ensure individual success, reduce criminal recidivism, and to ensure increased public safety.

The MH Trust: Dis Justice - Implement Assess, Plan, Identify, & Coordinate (APIC) is based on a national best practice model that connects Trust beneficiary offenders re-entering the community to appropriate community behavioral health services & when appropriate, prior to release applies and receives prior authorization for Supplemental Security Income (SSI)/Medicaid benefits for the beneficiary offender. This project started in FY2008 with a clinician caseload of 65, the current caseload has exploded to 128 with 30 referrals pending. At current caseload levels, public safety is at increased risk and successful reentry into Alaskan communities is jeopardized.

This project maintains a critical component of the Disability Justice Focus Area plan by proactively engaging the community treatment provider with the soon-to-be-released offender, so a plan is developed and secured for the offender to transition into once released from Department of Corrections (DOC) custody, thus decreasing the risk of recidivism and the associated high costs of care within the correctional setting. DOC staff will collect data on how the project saves correctional costs, number of beneficiaries served, and the number of beneficiaries qualified, pre-release, for SSI/Medicaid.

The FY2013 MHTAAR increment maintains the FY2012 momentum of effort The FY2013 GF/MH increment is required along with a position to expand the APIC program with an additional mental health clinician, redistributing the caseload to ensure individual success, reduce criminal recidivism, and to ensure increased public safety.

<p>Currently, the mental health clinical staff at the Hiland Mountain Correctional Center (HMCC) is unable to keep pace with the increasing demand for mental health services of incarcerated women at HMCC. The DOC mental health staff currently serves a population of 420+ female inmates, of which 120-30 is currently active on the mental health caseload, an increase of approximately 20% since last year. DOC will need another position for a clinician to manage the high needs of these offenders.</p> <p>The demand for mental health services has also outgrown the current staffing ratios at DOC facilities in the MatSu Valley (Palmer Correctional Center (PCC), MatSu Pre-Trial (MSPT) and Pt. Mackenzie (PTMC)). Currently two Mental Health Clinicians cover three facilities serving 734 inmates. The number of remands at MSPT has gone from 162 per month in 2002 to 342 a month in 2011, as a result almost doubling the number of inmates coming in contact with Mental Health. The Sub-Acute treatment unit at PCC has gone from a maximum of 20 Severely Mentally Ill (SMI) beds to 38 SMI beds. This increase in numbers has resulted in staff working additional hours to meet the need of the population, which over the long term cannot be maintained. DOC requires another position for a clinician to manage the high needs of these offenders.</p> <p>Clinician services include, but are not limited to, completing mental health assessment and programming, monitoring for safety, and developing appropriate release plans.</p> <p>The FY2013 MHTAAR increment maintains the FY2012 funding level for mental health clinicians at Wildwood Correctional Center and the Anchorage Correctional Complex. Location change of vacant PCN 20-8221, Licensed Practical Nurse, from Seward to Kenai.												
Wildwood Correctional Center (WWCC) has expanded its bed capacity bringing a total of 94 new inmates to the facility. During FY2011, 32 new beds were added and another 62 beds have been added in FY2012. WWCC is a converted Army base consisting of 14 buildings covering 138 acres; this expansion has added two additional buildings to the campus causing Nursing staff to drive between buildings to maximize shift hours and provide health care as required under statute. With the current staffing, there is only one nurse on-duty three days a week. On those days, a single nurse has to pass medications two to three times a day at four different buildings, conduct sick call, draw blood for labs, take blood sugars, etc. This need, combined with 94 new inmates requiring intakes, physicals, clearances, sick call, etc., simply cannot be met with the current staffing level allocated to Wildwood. Transferring this position will assist in meeting the medical needs of the WWCC population.

This request will expand vocational education services provided through the Department of Corrections (DOC) to incarcerated offenders under the department's custody.

Providing vocational education to inmates increases their likelihood of employment following release. Meaningful employment leads to financial stability. This can be a turning-point for an ex-offender. Becoming financially stable and becoming a functional member of the community lessens the likelihood of their reoffending and returning to prison. Vocational programs have been implemented in seven of the in-state institutional facilities. This funding will provide continued and expanded support of existing programs such as:

Alaska Marine Safety Association (AMSEA) marine survival and drill conductor training: Trains the students to be emergency drill conductors on commercial fishing boats.

Animal care vocational certification: The animal behavior and obedience and grooming training is designed to provide instruction in skills to obtain animal grooming related employment opportunities when inmates are released from incarceration.

Confined space entry certification: Delivered by OSHA certified instructor and designed to train and certify individuals who work in confined spaces under the OSHA definition.

Flagger Certification: Allows an inmate to earn a four year certification after completing the flagger course and exam.

HAZWOPPER Certification: Emergency response training for general site workers engaged in hazardous substance cleaning-up operations. Each inmate will be certified as an individual who is OSHA certified.

Occupational Safety and Health Administration (OSHA) 10: 10 hour OSHA safety certification.

Small engine repair: A 50 hour, two and four cycle, small engine repair class offering classroom and hands on training.

The department has transferred PCN 20-6863, a vacant Adult Probation Officer III position from the Sex Offender Management Program component to the Statewide Probation & Parole component. This transfer also changed the duty station from Anchorage to Bethel to allow expanded sex offender oversight within the Bethel community.

This transfer provided the Bethel Regional Probation Office with the expanded support needed for the sex offender population in Bethel. Before this transfer,

<p>Expand the current sex offender management oversight within the Bethel community to provide community outpatient sex offender treatment. These services are critically needed because of the large number of sex offenders on probation or parole supervision in southwest Alaska.</p> <p>The Bethel Probation/Parole Office supervises over 100 convicted sex offenders living in Bethel and in the rural villages of the Yukon-Kuskokwim Delta. Completion of sex offender management has demonstrated to substantially lower the risk of re-offending. At this time, the Department of Corrections (DOC) provides residential sex offender management through the Tundra Center Community Residential Center. However, community outpatient sex offender treatment is severely lacking. The sex offenders are released from the Tundra Center upon graduation from the residential program but fail to receive after care and outpatient treatment. This increased support will improve transition for offenders that graduate from the Tundra Center and return to their home village. This in-turn will lower the risk of re-offending. Additionally, this support will offer improved monitoring of sex offenders living in rural villages with no probation officer.</p> <p>The DOC will measure the outcomes of this program through data analysis and long-term monitoring of the offender following the completion of treatment.</p>

approximately 30 offenders. The DOC currently incarcerates over 600 convicted sex offenders at any given time during the year, however, the only opportunity for sex offender treatment while incarcerated is the 29 beds at LCCC. Due to current DOC treatment capacity, the great majority of these 600 convicted sex offenders will be released with no tools or skills to avoid a possible re-offense. This shortage will result in more untreated sex offenders releasing into the community placing the general public at a higher risk for re-offense.												
Results of the program will be measured through data collection on those who successfully complete the program versus the re-offense rate of a control group. The DOC will measure the outcomes through data analysis and long-term monitoring of the offender following the completion of treatment for re-arrests and re-offending.
