**Primary House District:**    13                    **Secondary House District(s):**            26

**Primary Senate District:**    G                    **Secondary Senate District(s):**            M

---

**Project Description**

**Principal's Priority**                    3

Augment existing analog CCTV system with a Network Internet Protocol (IP) digital video security system. Installation will include video management software (VMS), megapixel cameras, client workstations, viewing monitors, video storage servers, Power Over Ethernet (POE) switches, encoders, cables, wiring, raceway, labor, testing, and setup to give the District an upgraded turnkey Network IP digital video security system. Network Video Encoders will be used to incorporate our existing analog CCTV cameras into the new digital IP video security system. Scope of work includes replacing four analog cameras and installation of 10 additional IP cameras, one workstation and two monitors.

Muldoon Elementary's ability to keep school buildings, students, teachers, and property safe would be greatly improved through updated security systems.

**Benefits if Project is Funded**

Benefits – Additional and updated protection, crime reduction, and identification capacity for entire school building and property.

**Impacts if Project is not Funded**

Impacts – Security threats to people and property.

**# of Students impacted by project**            400
