Brief Summary and Statement of Need:

Alaskans rely on trails for recreation, subsistence, and transportation. These trails need maintenance to ensure safe passage and to ensure that they remain open and available for use. Funds are distributed by 80-20 matching grants for trail and trailhead development and maintenance, and for education programs relating to trail safety and responsible trail use. Grants are awarded to organizations, agencies and local governments. The end result is a variety of safe, high-quality, year-round, motorized and non-motorized, trails.

Project Description/Justification:

As more and more residents and visitors turn to Alaska's vast trail system for recreation, subsistence and basic transportation between communities, the need for a more extensive and better maintained trail system continues to grow. Many existing trails are being lost as property is sold, subdivided, or developed without reserving trail easements.

This program is effectively identifying, maintaining and expanding the Alaska trail system. Legal, safe, well maintained and easy to use trails are reducing trespass situations, search and rescue occurrences, and public safety concerns. Because this is a matching grant program, grantees provide cash, labor and equipment to match at least 20 percent of grant funds, effectively stretching existing funding. Public recreational trails contribute to Alaska's economy by providing construction

and maintenance jobs, attracting tourists and visitors, and by stimulating the business of outfitters, guides and tour companies. In addition, the Recreational Trails Program ensures that:

- Grantees obtain legal access
- Projects are consistent with federal, state and local land use plans
- Social and economic impacts are analyzed
- Archeological and historical resources are protected
- The project is analyzed for any impact on threatened or endangered species
- The project is analyzed for any impact on fish and wildlife
- The project is analyzed for its effect on wetlands, flood plains and bodies of water
- Water quality is maintained
- Hazardous waste is checked for and identified
- Air quality is checked
- The noise resulting from the project is analyzed
- There is public involvement

This program recommends the split of the funding to be 30% non-motorized, 30% motorized, and 40% diversified if possible.

WHY IS THIS PROJECT NEEDED NOW – WHAT IS THE IMPACT OF REMAINING STATUS QUO?

Alaska’s trails are gradually being lost due to community expansion and development pressure, the lack of legal easements, and the lack of maintenance. The recreational trails grant program provides an opportunity to maintain what we have, establish new trails, and preserve existing recreational access throughout the state.

WHAT ACCOMPLISHMENTS HAVE BEEN ACHIEVED WITH PRIOR YEAR FUNDING?

In FFY2008, 29 grants awarded, in FFY2009, 36 grants awarded, in FFY2010, 39 grants awarded, in FFY2011, 41 grants awarded, in FFY2012, 11 grants awarded.
