

AP/AL: Appropriation **Project Type:** Equipment / Commodities
Category: Health/Human Services
Location: Statewide **House District:** Statewide (HD 1-40)
Impact House District: Statewide (HD 1-40) **Contact:** Jennifer Klein
Estimated Project Dates: 07/01/2014 - 06/30/2019 **Contact Phone:** (907)465-1870

Brief Summary and Statement of Need:

This project will ensure that communities continue to have the ability and capacity to leverage available funds from United States Department of Agriculture (USDA), private and local funds. The Code Blue Steering Committee was formed to identify and purchase critical Emergency Medical Services (EMS) equipment and ambulances for agencies around the state, particularly in rural locations. \$500,000 is required to match federal, local and private funds to be allocated for all seven regional offices for such needs as ambulances, heart monitors, training equipment, and communications equipment. One dollar in state general funds leverages more than four additional dollars in other fund sources.

Project Description/Justification:

The Code Blue Program is coordinated by a steering committee comprised of representatives from the Alaska Section of Emergency Programs, and the seven Emergency Medical Services Regions:

- Interior Region Emergency Medical Services Council, Inc.
- Maniilaq Association
- North Slope Borough
- Norton Sound Health Corporation
- Southeast Region Emergency Medical Services Council, Inc.
- Southern Region Emergency Medical Services Council, Inc.
- Yukon Kuskokwim Health Corporation

To provide effective life-saving services, the Emergency Medical Services Ambulances and Equipment Statewide - Match for Code Blue Capital Grant Program assists with ambulances, first responder personnel needs and adequate and reliable emergency medical equipment. The Department of Health and Social Services, in collaboration with the Emergency Medical Services Regional offices throughout the state, has documented a critical need for essential capital equipment and ambulances, particularly in rural communities. Many old ambulances and equipment were purchased with federal grants in the late 1970s and early 1980s. These vehicles and equipment must be replaced to ensure the continued viability of a statewide, comprehensive, life-saving emergency medical services system.

The process for dispersing Code Blue funds is as follows:

- The regions annually solicit requests for essential capital equipment;
- A request must be accompanied by a strong justification;
- The requests and justifications are reviewed, approved and prioritized by the regional emergency medical services offices. Patient care items must be approved by a physician medical director at local or regional level;
- The regional offices forward approved requests to the Code Blue Steering Committee; the Code Blue Steering Committee reviews and approves or may deny request or seek further explanation in order to make a sound judgment;
- Costs of individual items range from \$300 to over \$200,000 for a fully equipped ambulance.

This process ensures that a request is for an essential capital item, that the request is medically appropriate and reasonable, and that a priority is assigned to each request for funding.

Through a collaborative effort of various funding agencies such as the United States Department of Agriculture (USDA), the Rasmuson Foundation, the Denali Commission, and local communities, over \$20,500,000 of new equipment has been purchased since program inception in FY2002. Key to this success is the local match pledged by communities, leveraging of other funding sources, and the considered use of the capital funds made available annually for Code Blue matching funds. Requests continue to come in each year to replace broken and outdated items, ensuring that the system remains healthy. The Rural Development Office has a community grant program that can fund up to 75 percent of the cost of an ambulance and medical equipment for communities that meet certain eligibility criteria. The remaining 25 percent must be provided as matching funds. Funds from this appropriation will be used to match the federal government and other fund sources,

and will help purchase equipment for communities that have critical equipment needs but are ineligible for other funding.

The Federal Rural Development Office Community Grant Program is an ongoing program that Alaska could presumably continue to access on an annual basis to support replacement of outdated emergency medical services equipment and ambulances. Requests for replacement of equipment depend on depreciation or obsolescence. The ongoing capital appropriation demonstrates to other agencies that the state is committed to the Emergency Medical Services Code Blue program.
