- Sec1 Ch30 SLA2007 P78 L3 SB53 \$500,000

Project Description/Justification:

Statewide, the department is responsible for 23 harbor facilities. Most of these facilities are thirty to forty years old and have received minimal maintenance funding prior to 2007. The department has prepared a harbor deferred maintenance list to prioritize repairs. This budget request would be used to fund repairs at the top prioritized harbor facility at Elfin Cove on Chichagof Island. Starting in 2009, the department has tried to complete at least one major harbor deferred maintenance project annually thereby reducing the department's overall backlog of harbor projects from \$27M (FY09) to \$13.8M (FY15).

Elfin Cove Outer Float and Seaplane Base Float was built in 1960. In 1988, repair work was done to the gangway and the floats. This float is essential to the economic livelihood of the community of Elfin Cove in that it provides for the delivery of goods and services, furthers the interests of local commercial fishermen and charter operators, and serves as the principle means of transportation to and from the community. Additionally, the seaplane float is the emergency egress means for the

community. The harbor facility has broken main stringers, excessive gaps between floats, a substandard ADA gangway, and could become a public safety hazard if not repaired. Funding would be used for the design and construction of a replacement float project. Additional GF funding may be necessary to complete the project.

Project Name	Legislative District	Total Project Cost
1. Elfin Cove Outer Float and Seaplane Base Replacement	34Q	\$600,000
	Total	\$600,000
