Additional Information / Prior Funding History:

Project Description/Justification:

This project will replace four oil-fired heaters with a central boiler and install hydronic piping throughout the school. The current configuration causes uneven heating of the building. Excessive heat and pressure routinely build up in one duct, preventing full airflow and causing thermostat shutdown. Anderson K-12 is 26 years old and covers 41,066 square feet. Proposed cost: \$1,663,237.
