**Additional Information / Prior Funding History:**

**Project Description/Justification:**

This project will renovate and expand the 26,683 square foot school facility, some of which was built in 1958, to 43,929 square feet. The existing structure is located near an eroding bluff that is undermining the integrity of walkways and playground equipment. Included in the renovation work are electrical upgrades, roof replacement, and upgrades to the school's fuel storage system. The school is currently at 134 percent capacity and it is expected to reach 185 percent capacity in seven years. Proposed cost: \$11,159,082.
