Village Safe Water Projects

AP/AL: Appropriation with Allocations
Category: Health/Safety
Location: Statewide
Election District: Statewide
Estimated Project Dates: 07/01/2001 - 06/30/2006

Project Type: Construction
Recipient: Various
Contact: Dan Easton
Contact Phone: (907)465-5135

Brief Summary and Statement of Need:
Grants to communities for designing and constructing water, sewer and solid waste facilities.

Funding:

Prior Funding History / Additional Information:
Village Safe Water Projects with federal funding has received prior appropriations of $31,396.3 in FY 98, $31,881.2 in FY 99, $37,742.5 in FY 00, and $49,669.7 in FY 2001.
The Village Safe Water program provides technical and financial support to Alaska’s smallest communities to design and construct water, wastewater and solid waste facilities. Each year, grant funds are made available to the State through the U.S. Environmental Protection Agency (EPA) and the U.S. Department of Agriculture-Rural Development (USDA-RD) program. Those funds require the State to appropriate matching funds. Communities apply each year to the State for grants for sanitation projects. Applications are scored weighing primarily the extent to which proposed projects address critical public health needs, as well as the communities’ capacity to operate and maintain the facilities. Grants are awarded for the highest ranking projects. Village Safe Water program engineers work directly with community officials to make sure that planning results in facilities that are appropriate for each community, that facilities are properly and efficiently constructed, and that state and federal grant funds are used appropriately.

This particular appropriation funds grants to communities for designing and constructing water, sewerage and solid waste facilities. The appropriation is funded with a combination of federal grant funds and state matching funds at a ratio of three federal grant dollars for each matching state dollar (a 25% state match).

In previous years separate appropriations were requested for projects funded with EPA funds and projects funded with USDA-RD funds. This was necessary because of differences in federal program requirements and procedures. Recent federal program changes eliminated these differences making it possible to match both federal grants with a single state appropriation.
