

Pacific Salmon Treaty

FY2002 Request: \$18,000,000
Reference No: AMD33647

AP/AL: Appropriation
Category: Development
Location: Statewide
Election District: Statewide
Estimated Project Dates: 07/01/2001 - 06/30/2006

Project Type: Planning
Contact: Amy Skilbred
Contact Phone: (907)465-6139

Brief Summary and Statement of Need:

The federal fiscal year 2000 (FY00) appropriations legislation established a Pacific Coastal Salmon Recovery Fund and appropriated a total of \$58 million for the states of Alaska (Southeast Sustainable Salmon Fund), Washington, Oregon and California, as well as the treaty fishing tribes in the Pacific Northwest. Coordination of the fund is through the respective Governor's offices. The Alaska portion of the federal FY00 appropriation was \$14 million and is expected to be \$18 million in federal FY01.

Funding:

	FY2002	FY2003	FY2004	FY2005	FY2006	FY2007	Total
Fed Rcpts	\$18,000,000						\$18,000,000
Total:	\$18,000,000	\$0	\$0	\$0	\$0	\$0	\$18,000,000

<input type="checkbox"/> State Match Required	<input type="checkbox"/> One-Time Project	<input type="checkbox"/> Phased Project	<input checked="" type="checkbox"/> On-Going Project
0% = Minimum State Match % Required		<input checked="" type="checkbox"/> Amendment	<input type="checkbox"/> Mental Health Bill

Operating & Maintenance Costs:

	<u>Amount</u>	<u>Staff</u>
Total Operating Impact:	0	0
One-Time Startup Costs:	0	
Additional Estimated Annual O&M:	0	0

Prior Funding History / Additional Information:

Ch 135, SLA 2000, Sec 1, pg 14 appropriated \$14 million in federal funds.

Summary of the Federal Fiscal Year 2001 Authorization and Appropriation

The purpose of the fund is articulated in the federal legislation: "For salmon habitat restoration, salmon stock enhancement, salmon research, and implementation of the 1999 Pacific Salmon Treaty Agreement."

The federal FY01 legislation also has several requirements relating to the Southeast Sustainable Salmon Fund:

1. Up to a 25 percent non-Federal match will be sought. This amounts to a \$4.5 million in-kind or direct match for the Alaska fund. The State intends to provide an in-kind match consisting of existing State salmon expenditures in the Pacific Salmon Treaty region, and in-kind and cash contributions from cooperators in salmon research, restoration and enhancement. This approach assures there will be no general fund impact to the State of Alaska.
2. A limitation that not more than 3% of the \$18 million Alaska appropriation be spent on administrative expenses. This caps State administrative expenses at \$540,000 for the Alaska appropriation and assures that expenditures will fund real on-the-ground projects and research.
3. A State-Federal Memorandum of Understanding (MOU) was signed in 2000. The MOU does not require federal approval of State projects funded by the appropriation. The MOU will be amended to include this additional \$18 million.
4. Allowance for expenditure outside Alaska. This allows Alaska the option of partnerships with Canadian, northwest states, or treaty fishing tribes to conduct salmon research or restore salmon habitat of concern to Alaska fishermen and managers, even if the project is not in Alaska.
5. \$1 million has been allocated by Congress to the Metlakatla hatchery and \$350,000 has been allocated to the Crystal Lake Hatchery.

The Southeast Sustainable Salmon Fund

The State intends to apply the salmon funds over a five-year period to address, primarily in Alaska east of Cape Suckling, the authorized objectives of salmon habitat restoration, salmon research and monitoring, and salmon stock enhancement. The effort will engage experts in biological and fisheries science along with Alaska fishing stakeholders and community leaders in an open public process that will identify priority needs and opportunities. The overall objective will be to assure that southeast Alaska's salmon fisheries are sustainable and continue to provide jobs and income for Alaskan families. A second important objective will be to engage residents of Alaska coastal communities in implementation of funded projects. Funding for restoration projects will be focused on local hire and jobs in Alaska coastal communities in order to maximize benefits to Alaska in terms of employment and local business opportunities.

Benchmarks for application of the salmon fund in State fiscal year 2002 are:

1. Amend the State-Federal Memorandum of Understanding (MOU) defining strategies for effective salmon research, habitat management and restoration, and stock enhancement.
2. Convene a biological science and fisheries panel to advise the State on salmon research needs, opportunities and priorities.
3. Complete a regional salmon habitat assessment and recommendations for salmon habitat restoration projects.
4. Convene the stakeholder panel to formulate priority recommendations for measures contributing to the economic and biological sustainability of salmon fisheries in Southeast Alaska.
5. Continue to provide a forum whereby Alaska coastal community leaders and residents in the Pacific Salmon Treaty region may collaborate with the State, fisheries stakeholders, and scientists regarding priorities, research, and implementation of habitat projects and enhancement efforts.
6. Approve State FY02 project recommendations and begin funding and implementation.
7. Prepare a progress report to Congress, the federal Department of Commerce, and the Alaska Legislature.

Pacific Salmon Treaty

FY2002 Request: \$18,000,000
Reference No: AMD33647

The Office of the Governor, through the Office of Management and Budget and with the science advisors, will provide overall administration and accountability in accord with the general intent of the federal legislation. The Alaska Department of Fish & Game (ADF&G) will coordinate the biological science and fisheries advisory panel, the stakeholders panel, a forum for local community participation, and--pursuant to the required MOU, the National Marine Fisheries Service. Based on that coordination, ADF&G will make periodic funding recommendations to the Governor. Consistent with applicable laws and regulations, the State may award grants, direct funding to State agencies, or enter into contracts to implement the priority recommendations regarding salmon habitat, research, and enhancement.

The Administration will pursue the concept of establishing an Alaska marine science endowment for habitat management, restoration, scientific research and monitoring of southeast Alaska watersheds and marine resources. If the federal government provides additional funding for the Pacific Salmon Treaty as promised, then these funds have potential to help seed such an endowment.
