Brief Summary and Statement of Need:

This project will remove and replace approximately 22,000 square feet of the terminal roof. The age of the roof areas to be replaced will exceed thirty years in 2002 and it is forecast that continued spot maintenance to ensure the integrity of the old roof system would no longer be feasible or economical. A new Inverted Roof Membrane Assembly (IRMA) roof will be designed to provide improved drainage and insulation and to protect the terminal building and furnishings.
