Project Description/Justification:

Reconstruct the Dalton Highway between approximately MP 37-49. The project will include embankment reconstruction in selected areas, elevated grades to reduce the snow drifting and re-occurring maintenance problems, culvert and guardrail repairs and replacements, and resurfacing. Delineators are also needed to mark the road during winter white-out conditions. This is one of the most difficult stretches of this highway, a vital link to ensuring long-term access to a major source of US oil and gas supply.
