**Brief Summary and Statement of Need:**

Rebuild a critically located highway and aviation maintenance station located in the Brooks Range on the Dalton Highway. This station is not only critical to keeping the important Dalton Highway open, especially in winter conditions, it is also a logical check point for traffic heading to the nationally critical oil and gas fields of the North Slope. The existing maintenance station was razed previously due to structural failure and the maintenance staffs there are working out of substandard tents in the Arctic.
