Additional Information / Prior Funding History:

None.

Project Description/Justification:

The Airport Master Plan (1987) identified the need to upgrade the existing runway safety area. The current safety area is 60% of standard. The project will address safety area deficiencies at this (Federal Aviation Regulations) Part 139 Certificated airport (scheduled air service of aircraft having a seating capacity greater than 30 passengers) which is an FAA (Federal Aviation Administration) mandate.
