

Abandoned Mine Lands Reclamation Federal Program

FY2006 Request: \$1,500,000

Reference No: 6855

AP/AL: Appropriation

Project Type: Health and Safety

Category: Public Protection

Location: Statewide

Contact: Bob Loeffler

House District: Statewide (HD 1-40)

Contact Phone: (907)269-8600

Estimated Project Dates: 07/01/2005 - 06/30/2008

Brief Summary and Statement of Need:

The Legislature enacted the Alaska Surface Coal Mining Control and Reclamation Act in 1983 (AS 27.21). One of the main purposes of the act was to promote the reclamation of areas mined and left without adequate reclamation before enactment of the federal Surface Mining Control and Reclamation Act of 1977. These mined areas endanger public health and safety, substantially degrade the environment, and prevent the beneficial use of or cause damage to land and water resources. This program will employ up to 50 Alaskans in private sector jobs as part of the reclamation efforts.

Additional Information / Prior Funding History:

- SLA04/CH159 - \$1,500,000
- SLA03/CH82 - \$1,500,000
- SSLA02/CH1 - \$1,500,000
- SLA01/CH61 - \$1,500,000
- SLA00/CH135 - \$1,500,000
- SLA99/CH2 - \$1,500,000
- SLA98/CH139 - \$1,500,000
- SLA97/CH050 - \$800,000

Project Description/Justification:

Funds from the AML Trust Fund can only be spent for reclamation of AML sites (AS 27.21 and 11 AAC 90). The AML program has identified 16 coal sites and 124 non-coal sites requiring reclamation at a cost of \$36,000,000. It is estimated that Alaska will receive an additional \$6,000,000 to \$12,000,000 by the end of the program. The highest priority sites will be worked on first. The highest priority sites are those that are an extreme danger to public health and safety. The types of hazards are mine pit highwalls, open portals and shafts, dilapidated structures and equipment, dangerous impoundments, clogged streams, dangerous mine waste piles, surface coal fires, polluted water, and industrial and residential waste. AML sites occur on private, state, native and federal lands.

Abandoned Mine Lands Reclamation Federal Program**FY2006 Request: \$1,500,000****Reference No: 6855**

The AML program will award 4-6 construction contracts annually totaling approximately \$1,228,000 to Alaskan contractors. Seasonal employment will be provided for 50-100 Alaskans and many more indirectly in the adjacent communities. The benefit to Alaska is that public health and safety hazards on private, state, native and federal land will be reclaimed improving the quality of life in Alaska, save lives, reduce injuries and enhance land values and uses.

In addition to the federal grant the AML program receives small amounts of money from other federal agencies for cooperative projects. This funding is less than \$50,000 annually.

As part of the CIP authorization the AML program receives \$272,000 for administrative costs in their annual federal grant. These funds are authorized in the operating budget. Administrative costs are 100% federally funded.

Why is this Project Needed Now:

Federal funding for the reclamation of AML sites is currently available to the State but will not continue much longer. The AML Trust Fund will sunset in 2007 or 2011. There are no other sources of funding for AML reclamation at this time.

Specific Spending Detail:Line Item Expenditures:

Personal Services \$252,000 - Costs are for project design, contract preparation and contract administration.

Travel \$20,000 - Cost of transportation, lodging and per diem for contract administration.

Services \$1,228,000 - Cost for 4-6 construction contracts per year.

Project Support:

Project support varies from project to project but is usually from the landowner/land manager, mineral owner, adjacent community, the construction industry and special interest groups such as environmental and historical groups.

Project Opposition:

There is no opposition to the stated objectives of the program. The program has substantial flexibility in its hazard abatement methods and concerns can generally be overcome.
