**Additional Information / Prior Funding History:**

None.

**Project Description/Justification:**

This allocation provides funding to the City and Borough of Juneau for eligible improvements at up to six bridge locations on city streets. These bridges vary in type and age, but all have deficiencies that could be remedied through a construction contract. Some preparatory work has already been accomplished. The most substantial work is proposed for the Basin Road trestle, but the final allocation of funding awaits a detailed, comprehensive assessment of each structure and its deficiencies, along with costs of planned improvements.

Timely attention to bridge deficiencies supports the Department's mission of improving the mobility of people and goods. These bridges play a necessary role in the transportation system, and warrant attention so that their service life can be maximized.

The funding earmarked by Congress for these improvements requires 20 percent match. Match will be provided by the City and Borough of Juneau.
