Additional Information / Prior Funding History:

None.

Project Description/Justification:

The existing 2-bay snow removal equipment building was built in 1979 and is 26 years old. It is a metal building that is unheated, uninsulated, and drafty. The roll-up doors do not work properly. It has a dirt floor, wood foundation, and is subject to hazardous material spills. This building needs to be demolished and replaced. Additional equipment needed to maintain the airport requires more space to be properly maintained and stored. Currently there is a grader with attachments. Funding has been requested for a new loader with attachments.
