Project Description/Justification:

Currently, the Airport has facilities support located in a number of places on the Airport. This situation creates an inefficient delivery system for Airport support in the concourses. The largest space for facilities support is almost a mile away from the Central Terminal Complex and is shared with Field Maintenance. Some storage is provided in unheated, portable, metal connex containers.

These operations were to have been considered in the new Concourse C. However, the consolidated facility was taken out of the project resulting in limited closet space available and no maintenance areas in Concourse C. This concourse added 460,00 square feet (sf) to the 1.3 million sf already maintained by staff. The Airport has limited staff. Staff currently maintain 25 separate buildings on the Airport. Staff has not grown in the last 10 years and is not expected to grow in spite of Concourse C's additional square footage. A consolidated facility will allow the Airport to continue to maintain these public facilities in a efficient manner consistent with public expectations. It will allow co-location of supplies, heated supply storage and be within a few minutes walk of the Central Terminal Complex.
