Appropriation: Airport Improvement Program

Brief Summary and Statement of Need:

Master Plans are dynamic documents and must be revisited every 5 years or so to update information about current operations and leasing, as well as economic, financial, environmental and surface transportation issues. The 2006 update will address the Part 150 Noise Compatibility Program. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Project Description/Justification:

The update will assess changing cargo and passenger markets, updating forecasts and identify airport capacity problems, and recommend short, medium and long term plans. The Part 150 Update will prepare new noise contour maps and programs to reduce airport noise impacts on the community. Environmental assessments for capital improvement projects in the Master Plan will be completed.

Master plans include recommendations for short term, intermediate and long term improvements, as well as periodic assessments about the degree to which accomplishments have addressed the airport's changing needs and requirements.
