

**State of Alaska
FY2007 Governor's Operating Budget**

**Department of Health and Social Services
Residential Child Care
Component Budget Summary**

Component: Residential Child Care

Contribution to Department's Mission

The Residential Child Care component provides 24-hour care for children in the custody of the State who are not able to remain in their own home or who need more structure and treatment than can be provided in foster care. These children and youth often present severe and complex treatment problems such as sexual abuse, sexually aggressive behavior, substance abuse, severe emotional disorders, delinquent behavior, and other dysfunctional behavior.

Core Services

Residential care services are purchased from private providers throughout the state and include emergency stabilization and assessment centers, intensive residential treatment centers, residential diagnostic treatment centers and residential psychiatric treatment centers. Grants are also provided to residential centers that provide specialized services such as sex offender treatment and substance abuse treatment.

When the necessary level of care is not available within the state, services are purchased from out-of-state providers. Out-of-state providers are approved Alaska Medicaid providers of residential psychiatric treatment in both secure and non-secure settings.

Residential Care is operated on an unconditional care model, meaning programs are not to discharge clients or refuse their placement unless the child presents an "imminent risk of harm to themselves or others."

FY2007 Resources Allocated to Achieve Results		
FY2007 Component Budget: \$5,402,900	Personnel:	
	Full time	0
	Part time	0
	Total	0

Key Component Challenges

Support for Bring the Kids Home – OCS is playing an active role in the Department’s Bring the Kids Home Initiative while working with Alaskan resident care facilities to ensure children in need of services are adequately supported, and in turn, enabling facilities to enhance program capacity.

Accreditation of Residential Care Facilities: The Department will continue to work on improving the quality of care for children and families in our Residential Child Care programs through a combined strategy of increased training to staff and technical assistance to provider agencies in completing their accreditation process.

Significant Changes in Results to be Delivered in FY2007

The addition of new Behavioral Rehabilitation Services (BRS) beds for non-custody children (budgeted in the Children's Medicaid Services component) will help further the Bring the Kids Home goals, by serving children closer to home and keeping families more involved and intact.

An increase to the Medicaid BRS rate (budgeted in th the Children's Medicaid Services component) will allow Residential Care Facilities the ability to re-focus funds to provide services to children with needs that currently are met out-of-state in anticipation of a successful Bring the Kids Home campaign. Adequate funding will allow for the development of facility infrastructure, increase the ability to attract the most experienced and educated workforce, and

provide necessary staff training and development.

The Office of Children's Services will continue to work with providers who seek contractual relationships with Section 638 organizations (Indian Health Service providers) to decrease the match requirement for Medicaid.

The Office of Children's Services continues to develop and work with the education plans for individual children who receive these services.

Major Component Accomplishments in 2005

The Department Provided Funding for Three Levels of Residential Care: The Department's Residential Child Care programs provided a continuum of three levels of care based on the assessed need of the individual child and the availability of bed space.

Level II Emergency Stabilization and Assessment: The Department purchased 74 Emergency Shelter treatment beds throughout the state to provide temporary residential care for children who were in immediate danger in their present environment. These treatment beds were also used for children who are not committable to Alaska Psychiatric Institute or to a detention facility and for whom no other satisfactory plan was immediately found.

Level III Specialized Residential Care: The Department purchased 112 Specialized Residential Care treatment beds throughout the state to provide a range of services from basic residential care to residential care for children with specialized needs such as emotional disturbance, behavioral dysfunction, sexual offending, and preparation for emancipation.

Level IV Residential Diagnostic Treatment: The Department purchased 15 Residential Diagnostic and Treatment beds in Anchorage to provide treatment for children who were a danger to themselves or others.

Psychiatric Nurse Program: The Office of Children's Services has five Psychiatric Nurses that serve as chair of the Regional Placement Committee. The nurses determine if the medical necessity for psychiatric residential services was met, assist each child's worker in monitoring the progress of children placed in out-of-state facilities, conduct site reviews and review treatment goals, discharge plans and medication.
