Additional Information / Prior Funding History:

None.

Project Description/Justification:

The Port Lions Airport is below the state standard for a community class airport and the runway has insufficient Runway Safety Areas beyond each approach end. The apron can become congested during the summer with aircraft and automobiles. There is no place to tie-down aircraft during high winds. The airport is used to access private property beyond the approach end of Runway 24. Relocation alternatives and modifications to the existing airport are being evaluated. The Port Lions Airport master plan is needed to evaluate the best option for improving this airport to meet current standards.
