**Estimated Project Dates:** 05/01/2007 - 06/30/2012

**Appropriation:** Airport Improvement Program

**Brief Summary and Statement of Need:**

This amends an existing FY2007 project. The project will relocate the airport and construct a new 3,280' X 75' runway, a new apron and taxiway, an airport access road, and a new equipment storage building and develop lease lots. The project will also install airport lighting. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage, by improving the mobility of people and goods and by increasing private investment.

**Additional Information / Prior Funding History:**

FY2007 - \$1,500,000; FY2005 - \$5,500,000.

**Project Description/Justification:**

The current runway, apron and taxiway do not meet state standards for a community class airport. The airport does not have a runway safety area and does not meet current dimensional standards for length and width. The runway floods several times each year and the surface area is degraded and soft. There are no lease lots. Airport lighting will improve operations and safety during hours of limited visibility and darkness.

The cost estimate for this project has increased to reflect inflation in the construction industry.

This project is scheduled to be advertised in May 2007.
