

Ted Stevens Anchorage International Airport: Security, Safety and Access Control Improvements

FY2008 Request: \$6,500,000
Reference No: 40616

AP/AL: Allocation

Project Type: Construction

Category: Transportation

Location: Anchorage Area-wide

Contact: John Torgerson

House District: Anchorage Area-wide (HD 17-32)

Contact Phone: (907)269-0724

Estimated Project Dates: 07/01/2007 - 06/30/2012

Appropriation: Airport Improvement Program

Brief Summary and Statement of Need:

This appropriation funds the installation and upgrade of security and safety improvements required by the Federal Aviation Administration (FAA) or recommended by the Airport Security Consortium. This project contributes to the Department's Mission by reducing injuries, fatalities and property damage and by improving the mobility of people and goods.

Additional Information / Prior Funding History:

FY2007 - \$7,474,000.

Project Description/Justification:

The following are types of improvements needed:

- ? Access control system upgrade
- ? Continued installation of proximity card readers
- ? Alarm, monitoring and surveillance devices
- ? Fencing and gates
- ? Other Airport security projects and equipment requirements

The Access control system needs to be upgraded in 2006 with the replacement of major components included. The reliability of the system is the primary indicator of the need for component replacements.

Airport perimeter and security fencing requires replacement, realignment and expansion in several areas. Damaged fencing needs repair or replacement. Some areas require fence relocation or realignment, or additional control gates. Fencing is required to meet FAA Parts 107 and 139 and is particularly needed for wildlife control and vegetation control.
