Additional Information / Prior Funding History:

None.

Project Description/Justification:

This facility is needed in order to use the new de-icing vehicle already in place. The chemical de-icing material is needed to reduce the use of sand at the airport because Maintenance and Operations cannot obtain sand that meets the minimum specifications identified in the new Federal Aviation Administration Circular. Unalaska has frequent periods of nil traction ratings which result in effective closure of the airport. This building is needed to house the new specialized de-icing truck in a controlled environment minimizing the possibility of a spill or handling accident.
