Project Description:

For the last three years the Hydaburg City School has met all of the standards of No Child Left Behind. This is, in large part, due to their teaching staff and their dedication to the students. However, the housing that the teaching staff is provided by the School District is gross disrepair. The housing is double-wide trailers and when the trailers were moved in, it was thought that it would only be good for 10-15 years. It has now been more than 20 years and the trailers are in a state of severe disrepair.

The \$350,000 would go towards the purchase and construction of three new homes. This investment would also benefit the local economy by employing local workers and offering training in construction.
