**Project Description:**

GHS provides transitional housing,treatment,and counseling for individuals upon release from our corrections system. The facility is in need of various maintenance projects and equipment upgrades. A new boiler is needed for the Security building, the current unit is malfunctioning and in need of constant repair. A keyless, secure swipe entry system will eliminate the need for a corporate wide, re-keying of the entire facility(this must be undertaken every 2-3 years for security purposes). Communications radios are needed to ensure the security of the entire GHS complex. Paving is needed for the ATCO, Administrative Office triplex, and Taku Manor building parking areas. Dressers are needed for resident housing. The maintenance shop is in need of necessary tools to perform basic upkeep. A covered walkway is needed between the ATCO building and Glacier Manor Residential Center.
