**Project Description:**

The hospital staff formulate and submit a capital equipment list each year to replace old equipment and update existing equipment to keep up with changes in technology. The residents of the service area benefit from the hospital being able to provide accurate, timely diagnoses and treatment locally so that travel to other locations for care is minimized. The community depends on the South Peninsula Hospital to be ready at all times to meet the residents' healthcare needs. A recent Community Survey found that 80.8% of the individuals surveyed would use the South Peninsula Hospital's laboratory for services when needed.
