Project Description:

The current boat haul out trailer is 15 years old and in serious disrepair. Every spring, fall and summer the trailer has to be repaired and patched together just to make it through the season. When the trailer is held up for repair during the summer months this is especially problematic since it delays pulling boat in and out, which is an important revenue source for the City. The \$50,000 would help to purchase a trailer that is safer and easier to put a boat. A newer model of boat haul out trailer will expedite the pulling of boats in and out of the water. It will also be safer to operate.
