Contribution to Department's Mission

To finance, design, construct, maintain and/or own all or part of a pipeline system to transport North Slope gas to market and maximize the benefits to Alaska and Alaskans.

Core Services

Produce key studies and plans to assure that alternative North Slope gas transportation systems are understood with specific emphasis on a gas trunk line to Cook Inlet and making gas available throughout Alaska.

### FY2009 Resources Allocated to Achieve Results

Key Component Challenges

The Alaska Natural Gas Development Authority (ANGDA) needs to combine the best of government and business to achieve the maximum benefit of North Slope gas for Alaska and Alaskans in the face of significant market and project uncertainties and with the availability of only minimal resources.

ANGDA has to maintain flexibility in all its work and plans because of:

- Evolving contractual relationship of State and producer sponsor group.
- Complexities and magnitude of firm financial commitments of Alaska utilities during an “open season”.
- Project timing delays and compression distinct from RCA approval timelines.
- Technological and logistical developments affecting North Slope energy delivery to rural Alaska.

Significant Changes in Results to be Delivered in FY2009

- Organize and lead utility and RCA through binding open season.
- Refine Cook Inlet natural gas spur line alignment and logistical impact on State highways. Further advance the permitting issues; technical and field studies; facility designs and technical engineering for pipeline segments including Delta Junction to Glennallen, Glennallen to Palmer, and Palmer to Beluga Gas Fields. Determine and design potential terminal points at Yukon River, Tok, Glennallen, Point MacKenzie; and Matanuska-Susitna Borough.
- Continue In-State Propane Distribution Planning with ANGDA leading the technical planning and public awareness of energy potentials for all Alaska. Collaborate with private industry (native and non-native) for spurring their involvement in entrepreneurial opportunities and ownership of facilities and businesses related therein.
- Oversee Yukon-Kuskokwim Propane Demonstration Project.
Major Component Accomplishments in 2007

Year 2007

1. ANGDA received its “conditional right-of-way (ROW) lease” from the Alaska Department of Natural Resources (ADNR). The purpose of the right-of-way is to connect the North Slope natural gas main pipeline to the natural gas distribution grid in South-central, Alaska.

2. ANGDA completed a Business Plan.

3. ANGDA published and released, “Report to the People – Connecting Alaskans to their Natural Gas”; and also published and released new Alaska pipeline & Alaska propane distribution maps.

4. ANGDA completed other work and reports in FY07 aiding in the advancement of pipeline project for transporting North Slope natural gas to market and South-central, Alaska:
   - Spur Pipeline Terminus Conceptual Design
   - Spur Pipeline Field Studies
   - Legal determination regarding Federal Loan Guarantees / In-State pipeline(s)
   - Regulatory Assessment(s)
   - ANGDA Enterprise Coordination & Business Plan Development
   - LPG / NGL Extraction reports
   - Preliminary Gas Pipeline Hydraulics

5. ANGDA contractual work underway as of FY07 year-end includes:
   - Additional Spur Pipeline Field Studies;
   - Spur Line Coordination;
   - Enterprise Business Development and Financial Considerations;
   - Gas Supply Issues and Coordination;
   - Open Season Training Workshops;
   - Permitting Strategy & Coordination;
   - Preparation of AGIA application addendum for in-state use of North Slope gas

6. During FY07, the ANGDA participated in hearings and public comments related to gas pipeline jurisdiction, laws, regulations, and contracts:
   - State of Alaska Fiscal Contract & Department of Revenue Best Interest Findings related to Alaska Stranded Gas Fiscal Contract with ConocoPhillips, BP, ExxonMobil
   - Alaska Gasline Inducement Act (AGIA)
   - Alaska Oil & Gas Conservation Commission (AOGCC)
   - Regulatory Commission of Alaska (RCA)
   - Alaska Legislative Committees

7. ANGDA participated in leadership roles at local, state, national and international oil & gas industry seminars, conferences, symposiums, and forums related to the development of Alaska natural gas, and its in-state and export potential(s).

8. ANGDA participated on the advisory panel of the U. S. Department of Energy’s studies related to Alaska Natural Gas Needs Assessment and Analysis of Spur Line Alternatives.

Year 2006

1. The Alaska Natural Gas Development Authority (ANGDA) received its final approval and granting of conditional right-of-way (ROW) lease (Glennallen to Palmer) from the Alaska Department of Natural Resources (DNR) in July 2006. The purpose of the right-of-way is to connect the North Slope natural gas main pipeline to the natural gas distribution grid in South-central, Alaska. The following field studies and reports were completed related to the ROW application:
• Bored River Crossings
• Fault Zone Crossings
• Soils Studies
• Archaeological Studies
• Native Land Owner Right-of-Ways
• Field & Helicopter Reconnaissance of Pipeline Route
• Route Alignment
• Permitting Plan
• New Technologies (surveillance and monitoring of gas pipelines)

2. The DNR Commissioner released his analysis and findings regarding ANGDA’s Glennallen- Palmer Conditional Right of Way Lease. DNR public hearings and ANGDA open houses were held in spring 2006.

3. ANGDA completed the following reports aiding in the further evaluation of transporting North Slope natural gas to market and South-central, Alaska:

• Permitting Comparison (Parks Hwy. and Glenn Hwy.)
• Commercial Evaluation: The Future of Nikiski (Kenai) Liquified Natural Gas (LNG) Plant
• Feasibility Study & Cost Assessment (Delta Junction to Glennallen / Trans-Alaska Pipeline System – TAPS)
• Analysis & Study of Cook Inlet Energy Alternatives
• Spur Pipeline Terminus Conceptual Design

4. The following contractual work is underway as of October 2006:

• Spur Pipeline Field Studies
• Legal determination regarding Federal Loan Guarantees / In-State pipeline(s)
• Regulatory Assessment(s)
• ANGDA Enterprise Coordination & Business Plan Development
• Liquified Petroleum Gas (LPG) and Natural Gas Liquids (NGL) planning and development

5. ANGDA participated in Borough and State hearings related to gas pipeline jurisdiction, laws, regulations, and contracts:

• State of Alaska Fiscal Contract & Department of Revenue Best Interest Findings related to Alaska Stranded Gas Fiscal Contract with ConocoPhillips, BP, ExxonMobil
• Alaska Oil & Gas Conservation Commission (AOGCC)
• Legislative Budget & Audit (L B & A)
• Matanuska-Susitna Borough (MSB Proposed Pipeline / Utility Right-of-Way Jurisdiction)
• Regulatory Commission of Alaska (RCA)
• ANGDA Proposed Statute Changes / In-State Gas Use and Tariffs

6. ANGDA participated in leadership roles at local, state, national and international oil & gas industry seminars, conferences, symposiums, and forums related to the development of Alaska natural gas, and its in-state and export potential(s).

7. ANGDA participated on the advisory panel of the U. S. Department of Energy’s studies related to Alaska Natural Gas Needs Assessment and Analysis of Spur Line Alternatives.

Year 2005
• Published a report related to an All-Alaska LNG project that provides Alaska with the maximum benefits from a North Slope natural gas pipeline entitled “Transport of North Slope Natural Gas to Tidewater” (Leveraging Issues, Configuration Descriptions & Issues, New Project Concept)
• Procured a specialized contractor to determine the feasibility of the marine transport of propane to coastal communities of Alaska.
• Submitted a right-of-way application to the Department of Natural Resources for Glennallen to Palmer segment of proposed spur line.
• Conducted public outreach related to Glennallen to Palmer right-of-way application.
Completed a summer 2005 work plan, wrote Requests for Proposals, and contacted potential contractors for field studies along proposed Glennallen to Palmer spur.

Completed and published the following reports:
- Vendor Cost Estimate for Propane Extraction Plan
- Interim Cook Inlet Spur Line Report
- 24" Spur Line from Glennallen to Palmer Conceptual Alignment & Budget Level Cost Estimate
- Authority Spur Line Report on Utility Regulation
- Financial Plan for the Cook Inlet Spur Line
- Cook Inlet Natural Gas Spur Line Right-of-Way and Permitting Issues

**Year 2004 (First Operational Year)**

- Defined feasibility of all-Alaskan LNG project to bring North Slope gas to market.
- Determined feasibility of a gas spur line linking a larger “main” line to the Cook Inlet area.
- Published “Report to the People” with distribution throughout the State of Alaska.

**Statutory and Regulatory Authority**

AS 41.41 Alaska Natural Gas Development Authority
