Additional Information / Prior Funding History:

FY2006 - \$685,000.

Project Description/Justification:

The existing structure is too small for the new airport rescue and firefighting (ARFF) vehicle. The ARFF truck can barely fit inside the existing building. It requires two personnel to maneuver the vehicle because the tolerances are very small. Access to the other interior facilities and equipment is severely limited when the ARFF truck is inside the building.

Operating and maintenance costs will be approximately \$5,000 per year, starting in FY2010
