Additional Information / Prior Funding History:

None.

Project Description/Justification:

Anticipated increases in the number and frequency of port calls in Sitka by commercial passenger vessels have made improvements to the berthing, mooring and energy capabilities essential. This project will improve the efficiency and quality of shore side support to the cruise industry and enhance the experience of passengers.

The City of Sitka has developed an improvement plan for the community's cruise ship lightering facility and the adjacent staging area. To provide additional staging areas and improve traffic flow, the plan includes construction of a new visitor staging area, restrooms, walkway, and other improvements to the immediate area. This funding will improve the city's marine infrastructure, leading to better access to the community and expanded opportunities for economic development in Sitka.
