Project Description/Justification:

Rezanof Drive is a National Highway System (NHS) route. The surface of the highway is rutted and has been patched to repair potholes. The resurfacing project will eliminate ruts, improve safety, reduce maintenance costs, and extend the useful life of the highway. Damaged guardrail will be replaced as will end terminals not meeting current design standards.

This project meets the prioritization criteria of safety and serves an economically distressed area. Advertising of this project is estimated to take place in Spring/Summer 2009.
