None.

Project Description/Justification:

The Fort Yukon Airport is a regional interior hub airport, with just under 10,000 enplanements. In the past, the City of Fort Yukon has been under a yearly contract to maintain the airport. However, they have advised the department that they are not interested in contracting to perform airport maintenance for more than an additional year or so. Consequently, the department needs to acquire maintenance equipment and construct a snow removal equipment building to house it, in accordance with Federal Aviation Administration (FAA) regulations.
