Brief Summary and Statement of Need:

The Seward Airport Taxiway was damaged by flooding from the Resurrection River in July 2009. Emergency repairs were completed in August of 2009. The Taxiway's location is a low point in the airfield and gets inundated with water every time the Resurrection River overflows its bank. As a short term solution the Department would like to install 19 new 42" culverts alongside the three existing 42" culverts. If funding is not provided for permanent repairs, the State will have to continue performing emergency repairs along the taxiway when the Resurrection River floods. This will cause the taxiway to be shut down and impairs the usage for the Seward Airport.
