<p>Additional statutory designated program receipts (SDPR) authority is needed in FY11 to accommodate two projects. Receipt of these funds were not anticipated when the FY11 budget was prepared. It is anticipated that the majority, if not all of these projects will be completed by the end of FY11. If either of the projects continue into FY12, the existing amount of SDPR authority within the component should be sufficient for the small amount of authority needed.</p> <p>The Division of Wildlife Conservation was notified in August 2010 that it was awarded a \$236.0 grant from the National Fish and Wildlife Foundation (NFWF) for Phase 2 of the Reducing Conflicts Between Grizzly Bears and Oil Development project. The intent of the project is to identify denning habitat, develop den detection methods, and study food conditioning mechanisms in order to reduce or eliminate conflicts between bears and North Slope oil development. This project began in FY09 and was extended in FY10. Phase 2 of the project should be completed by the end of FY11, but work is weather dependent.</p> <p>In addition, the Western Governors' Association will provide \$100.0 to contract with the Division of Wildlife Conservation to identify, prioritize, and display in geographic information system (GIS) format, crucial wildlife habitats and corridors in the state of Alaska. The resulting tool will be designed to guide siting of energy and transmission development to avoid or minimize impacts to wildlife. The department was notified of this new project in April 2010.</p>
