Project Description/Justification:

The mission of the Department of Military and Veterans Affairs Facilities Management Office is to provide, maintain and operate safe, secure, high quality facilities and training areas for the Alaska National Guard on a cost effective basis which meet or exceed mission requirements, environmental compliance standards, and energy efficiencies.

Funding is requested for the deferred maintenance projects at Alaska Army National Guard and other DMVA facilities, as listed below. Priorities and cost estimates may need to be changed to accommodate emergency maintenance projects not listed, actual project costs, and other considerations.

DMVA depends heavily on federal funding for 386 of its buildings at 83 communities across the State. The majority of these facilities are for Alaska Army National Guard. It is to the States' benefit to take advantage of federal funding opportunities that become available to renew facilities, reduce deferred maintenance, and lower operational costs by funding a small percentage of the total cost.

The unintended consequence of not fully funding the State portion of available federal funds is twofold. First, deferred maintenance gets pushed out to later years and facilities become degraded with higher future costs and sub-standard facilities. Second, federal funds sent to the State of Alaska, if not given the appropriate State match, can only be spent on federal installations. This reduces the ability to maintain facilities needed by guard members in rural Alaska.

This project requests \$4,542,500 federal authority to receive federal funds from National Guard Bureau and \$4,000,000 in general and match funding from the State. The percentage of State/Federal participation is determined by project and facility classification in accordance with National Guard Regulations and fluctuates based on specific projects and priorities. There are currently over \$50.1 million in backlogged DMVA deferred maintenance projects statewide.
