

FFY2013 State of Alaska Summary of Federal Priorities

Resource Development

Statewide Digital Elevation Mapping: Accurate elevation is foundational to infrastructure and economic development, aviation safety, and emergency response.

Marine Mammal and Fisheries Research: Informs management of the Endangered Species Act, Marine Mammal Protection Act, and federal and state fisheries.

Public Safety

Prevent Domestic and Sexual Violence: Prevention campaign promoting healthy relationships, and preventing sexual violence, suicide, and child sexual abuse.

Rural Drug and Alcohol Interdiction: Prevents the manufacturing and trafficking of illegal drugs and alcohol in rural Alaska.

Disaster Preparedness: Communication planning and coordination, search and rescue, and natural disaster response.

Transportation/Infrastructure

Rural Alaska Sanitation Initiative: Assist rural communities with planning, designing and constructing water and sewer improvements.

Denali Commission and Energy and Rural Transportation.

Military Support/Homeland Security

Arctic Development: Communication infrastructure, port development, USCG/Military mission support, icebreaking operations, oil spill response, search and rescue, and natural disaster response.

Strategic Defense and Training: Continued development of premier training and testing sites for all branches of our armed forces and ground based missile defense and space launch capability and capacity.
