**Project Description/Justification:**

The Facility Construction component within the Division of Water provides technical and financial support to Alaska's communities to design and construct drinking water and sanitation facilities. Communities apply each year to the state for grants for these projects. Applications are scored based primarily on the extent to which proposed projects address critical public health needs, as well as the communities' capacity to operate and maintain the facilities. Grants are awarded to the communities with the highest ranking projects. Each year communities propose more projects than the state has available funding.

Planned projects for FY2014:

Unalaska - Water Treatment Plant	\$3,090,000
