**Project Description/Justification:**
One of FMATS four goals identified in the metropolitan transportation plan is to optimize the utility and lifespan of the existing transportation system. FMATS achieves this goal through its annual preventive maintenance program, a federally-funded project that provides for preventive maintenance activities that demonstrate a cost-effective means of extending the useful life of a federal-aid highway. Preventive maintenance is a planned strategy of cost-effective treatments to an existing roadway system that preserves the system, retards future deterioration, and maintains or improves the functional condition of the system without significantly increasing structural capacity.
