This project is needed to advance work on projects to better define their scope and cost prior to initiation of the final design and construction.

**Project Description/Justification:**

This project is needed for design, prior to construction, to avoid impacts on airline fees, allow estimates to be refined before constructing, and place the airport in a better position to compete for federal discretionary funds. This project allows the airport to timely complete design, environmental permitting, and community involvement efforts needed for Federal Airport Improvement Program

(AIP) funding. Some projects will be designed to a schematic level. Completion of studies, plans, cost-benefit analysis, and other evaluations provide critical information and advance preparation for future projects.

This project will benefit all airport tenants and users by assisting the airport in doing preliminary work on any airport project before seeking airline authorization to undertake a project.
